The Routledge Handbook of Tourism

Experience Management and Marketing

HSRC Press

‘Be quiet and be calm, my countrymen, for what is taking place is exactly what you came to do ... Brothers, we are drilling the death drill.’ – Reverend Isaac Wauchope Dyobha Paris, 1958. A skirmish in a world-famous restaurant leaves two men dead and the restaurant staff baffled. Why did the head waiter, a man who’s been living in France for many years, lunge at his patrons with a knife? As the man awaits trial, a journalist hounds his long-time friend, hoping to expose the true story behind this unprecedented act of violence. Gradually, the extraordinary story of Pitso Motaung, a young South African who volunteered to serve with the Allies in the First World War, emerges.

Through a tragic twist of fate, Pitso found himself on board the ss Mendi, a ship that sank off the Isle of Wight in February 1917. More than six hundred of his countrymen, mostly black soldiers, lost their lives in a catastrophe that official history largely forgot. One particularly cruel moment from that day will remain etched in Pitso’s mind, resurfacing decades later to devastating effect. *Dancing the Death Drill* recounts the life of Pitso Motaung. It is a personal and political tale that spans continents and generations, moving from the battlefields of the Boer War to the front lines in France and beyond. With a captivating blend of pathos and humour, Fred Khumalo brings to life a historical event, honouring both those who perished in the disaster and those who

survived.

Independent Power Projects in Sub-Saharan Africa Springer

This is the first book to cover comprehensively and accessibly the area of applied criminology. It draws together leading experts with experience of teaching, research and practice. Each chapter engages with the application of criminology in a particular area of the community and criminal justice system, and offers: An overview of the relationship between criminological theory and policy and practice developments. Critical reflection on whether criminology has been meaningfully engaged - paying particular attention to the contemporary issues and debates. Evaluation of the implications for diverse communities,

paying particular attention to discrimination and oppression and criminal justice values. Summaries, case studies and further reading to support knowledge and understanding. The book is accompanied by a companion website to enhance the learning experience. This includes: Lecture notes Online readings Student exercises Case studies Useful links

Connecting ICTs to Development Theatre Communications Group

The Routledge Handbook of Tourism Experience Management and Marketing offers a comprehensive and thorough inquiry into both customary and emergent issues of tourism experience and co-creation. Drawing together contributions from 83 authors from 28 countries with varied backgrounds and

interdisciplinary interests, the handbook highlights multiple representations and interpretations of the theme. It also integrates a selection of illustrative global case studies to effectively present its chapter contents. Tourism experience drives the contemporary tourist's behavior as they travel in pursuit of experiencing unique and unusual destinations and activities. Creating a memorable and enduring experience is therefore a prerequisite for the all tourism business organizations irrespective of the nature of their products or services. This handbook focuses on conceptualizing, designing, staging, managing and marketing paradigms of tourism experiences from both supply and demand perspectives. It sheds substantial light on the

contemporary theories, practices and future developments in the arena of experiential tourism management and marketing. Encompassing the latest thinking and research themes, this will be an essential reference for upper-level students, researchers, academics and industry practitioners of hospitality as well as those of tourism, gastronomy, management, marketing, consumer behavior, cultural studies, development studies and international business, encouraging dialogue across disciplinary boundaries.

African Wild Life Woodhead Publishing
Douglas Board was hot-housed from an early age to be a member of the elite: the tiny coterie of people who run organizations, professions, interest groups, communities, and, at the highest

level, countries. The training worked, and he has been chair of a household-name charity, treasurer of another, and deputy chair of a board-level consultancy. Elites are also his specialist subject: he has a doctorate in selection for senior roles and, as a head-hunter and executive coach, he has spent three decades recruiting and mentoring new members of the top tier. In this revelatory book &- part how-to guide, part detective story of ideas &- he analyses 10 traps which hold back those on the upper rungs of the ladder from making it to the top and undermine their self-esteem. He also asks whether that final push to the top is worth it. Writing passionately from his own experience, Board argues that success in the fullest sense isn't about winning the most

glittering material prizes. For him, true fulfillment demands an adventure into the unknown inside ourselves: why do we seek what we seek? The answers can be surprising.

Elites Springer

This handbook is recognition of the need to better integrate physical and human geography. It combines a collection of work and research within the new field of Critical Physical Geography, which gives critical attention to relations of social power with deep knowledge of a particular field of biophysical science. Critical Physical Geography research accords careful attention to biophysical landscapes and the power relations that have increasingly come to shape them, and to the politics of environmental science and the role of biophysical

inquiry in promoting social and environmental justice. The Palgrave Handbook of Critical Physical Geography lays out the scope and guiding principles of Critical Physical Geography research. It presents a carefully selected set of empirical work, demonstrating the range and intellectual strength of existing integrative work in geography research. This handbook is the first of its kind to cover this emerging discipline and will be of significant interest to students and academics across the fields of geography, the environment and sustainability.

Microbiome Under Changing Climate

United Nations Publications

Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity

in Sub-Saharan Africa. Simply put, Africa does not have enough power. Despite the abundant low-carbon and low-cost energy resources available to Sub-Saharan Africa, the region's entire installed electricity capacity, at a little over 80 GW, is equivalent to that of the Republic of Korea. Looking ahead, Sub-Saharan Africa will need to ramp-up its power generation capacity substantially. The investment needed to meet this goal largely exceeds African countries already stretched public finances. Increasing private investment is critical to help expand and improve electricity supply. Historically, most private sector finance has been channeled through privately financed independent power projects (IPP), supported by nonrecourse or limited recourse loans, with long-term

power purchase agreements with the state utility or another off-taker. Between 1990 and 2014, IPPs have spread across Sub-Saharan Africa and are now present in 17 countries. Currently, there are 125 IPPs, with an overall installed capacity of 10.7 GW and investments of \$24.6 billion. However, private investment could be much greater and less concentrated. South Africa alone accounts for 67 IPPs, 4.3 GW of capacity and \$14.4 billion of investments; the remaining projects are concentrated in a handful of countries. The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment. At the core of this analysis is a reflection on whether IPPs have in fact

benefited Sub-Saharan Africa, and how they might be improved. The analysis is based primarily on in depth case studies, carried out in five countries, including Kenya, Nigeria, South Africa, Tanzania and Uganda, which not only have the most numerous but also among the most extensive experience with IPPs.

The Political Economy of Regionalism

Penguin Random House South Africa

Applied ethnomusicology is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited

volume is based on the first symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the United Kingdom, and the United States of America, divided into four thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music cultures; and the use of music in conflict

resolution situations. The edited volume *Applied Ethnomusicology: Historical and Contemporary Approaches* brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.

[Africa Today](#) Human Sciences Research Council

The book proposes new technologies and discusses future solutions for ICT design infrastructures, and includes high-quality submissions presented at the Third International Conference on ICT for Sustainable Development (ICT4SD 2018), held in Goa, India on

30–31 August 2018. The conference stimulated cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book focuses on innovative issues at an international level.

Accounting Info Systems Springer

This book offers a conceptual re-think of how university community engagement functions as a lifelong learning resource for communities. While having a specific focus on the South African context, it has important implications for other universities which are concerned with their communities, and makes a compelling argument for the university as a public good, in spite of current

trends towards marketization and commodification of higher education. The book draws on a theoretical framework of capabilities, asset-based community development, and the adult learning concept of dialogue, to propose a model whereby the boundary walls of the university become metaphorically 'porous', so that community members feel free to interact with the university as equal members of society. A historical outline of African universities is provided, as well as an exploration of the evolution of terms for community engagement, service learning and learning cities; and an examination of the policy and practice implications for the ideological model of a porous university.

Transforming Further Education and

Training in South Africa: Qualitative findings and analysis Inst of Education
 This publication (published in 2 volumes, not sold separately by TSO) is intended for people who have an interest in and practice disaster risk management and sustainable development. It provides guidance, policy orientation and inspiration, as well as serving as a reference for lessons on how to reduce risk and vulnerability to hazards and to meet the challenges of tomorrow. It consists of (vol. 1) the report, including case studies; and (vol. 2) annexes, for example, a glossary of specialized terminology , and a directory of international, regional, national and specialized organizations (vol. 2). It replaces the preliminary version which was released in July 2002 (not available

from TSO).

Public Procurement Regulation in Africa Springer

A variety of disciplines and professions have embraced geospatial technologies for collecting, storing, manipulating, analyzing and displaying spatial data to investigate crime, prosecute and convict offenders, exonerate suspects and submit evidence in civil lawsuits. The applications, acceptability and relevance and procedural legality of each geospatial technologies vary. The purpose of this book is to explain the nature of geospatial technologies, demonstrate a variety of geospatial applications used to investigate and litigate civil and criminal activities and to provide a reference of current acceptability of geospatial technology in

the production of evidence. This book is an introductory overview designed to appeal to researchers and practitioners across disciplinary boundaries. The authors of this book are researchers and practitioners across disciplines and professions, experts in the field.

Telehealth in the Developing World

IDRC

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted

infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

Living with Risk Cambridge Scholars Publishing

"Provides informed practical means of achieving and sustaining zero transmission. It is designed as a road map, providing direction and options from which to choose an appropriate path. The Prospectus reviews the operational, technical, and financial

feasibility for those working on the front lines and outlines the tools that can be considered for an elimination program." "[summary]"--Provided by publisher.

Rural Wealth Creation Routledge
 Microbiome Under Changing Climate: Implications and Solutions presents the latest biotechnological interventions for the judicious use of microbes to ensure optimal agricultural yield. Summarizing aspects of vulnerability, adaptation and amelioration of climate impact, this book provides an important resource for understanding microbes, plants and soil in pursuit of sustainable agriculture and improved food security. It emphasizes the interaction between climate and soil microbes and their potential role in promoting advanced sustainable agricultural solutions, focusing on

current research designed to use beneficial microbes such as plant growth promoting microorganisms, fungi, endophytic microbes, and more. Changes in climatic conditions influence all factors of the agricultural ecosystem, including adversely impacting yield both in terms of quantity and nutritional quality. In order to develop resilience against climatic changes, it is increasingly important to understand the effect on the native micro-flora, including the distribution of methanogens and methanotrophs, nutrient content and microbial biomass, among others. Demonstrates the impact of climate change on secondary metabolites of plants and potential responses Incorporates insights on microflora of inhabitant soil Explores

mitigation processes and their modulation by sustainable methods
Highlights the role of microbial technologies in agricultural sustainability

Critical Issues in South African Education Jonathan Cape

This book examines the regulatory rules on public procurement in selected African countries and provides a comparative analysis of key regulatory issues.

A Search for Origins NYU Press

This book investigates the role of wealth in achieving sustainable rural economic development. The authors define wealth as all assets net of liabilities that can contribute to well-being, and they provide examples of many forms of capital - physical, financial, human, natural, social, and others. They propose

a conceptual framework for rural wealth creation that considers how multiple forms of wealth provide opportunities for rural development, and how development strategies affect the dynamics of wealth. They also provide a new accounting framework for measuring wealth stocks and flows. These conceptual frameworks are employed in case study chapters on measuring rural wealth and on rural wealth creation strategies. Rural Wealth Creation makes numerous contributions to research on sustainable rural development. Important distinctions are drawn to help guide wealth measurement, such as the difference between the wealth located within a region and the wealth owned by residents of a region, and privately

owned versus publicly owned wealth. Case study chapters illustrate these distinctions and demonstrate how different forms of wealth can be measured. Several key hypotheses are proposed about the process of rural wealth creation, and these are investigated by case study chapters assessing common rural development strategies, such as promoting rural energy industries and amenity-based development. Based on these case studies, a typology of rural wealth creation strategies is proposed and an approach to mapping the potential of such strategies in different contexts is demonstrated. This book will be relevant to students, researchers, and policy makers looking at rural community development, sustainable economic

development, and wealth measurement.

Student Retention & Graduate Destination BRILL

The Political Economy of Regionalism: The Case of Southern Africa challenges prevailing wisdom, showing how ruling political elites and 'big business' join forces with certain external actors in order to promote market integration and economic globalization, boost regimes, and to satisfy group-specific and even personal interests. Only rarely do these forms of regionalism contribute to the poor and disadvantaged, who instead opt out, and survive through informal economic regionalisms or seek to create regionalisms rooted in civil society.

TEACHING SOCIAL SCIENCES Eye Books (US&CA)

Coal will continue to provide a major

portion of energy requirements in the United States for at least the next several decades. It is imperative that accurate information describing the amount, location, and quality of the coal resources and reserves be available to fulfill energy needs. It is also important that the United States extract its coal resources efficiently, safely, and in an environmentally responsible manner. A renewed focus on federal support for coal-related research, coordinated across agencies and with the active participation of the states and industrial sector, is a critical element for each of these requirements. Coal focuses on the research and development needs and priorities in the areas of coal resource and reserve assessments, coal mining and processing, transportation of coal

and coal products, and coal utilization.

Applied Ethnomusicology Springer
Nature

This book explores a century of business development of The South African Life Assurance Company, from a specific local focus to a national conglomerate expanding into global insurance markets. Established as a strategic vehicle to address Afrikaner economic marginalization and abject poverty at the beginning of the twentieth century, Sanlam has displayed both path dependence and a dynamic adaptability to complex changing contexts to become a global player. The strategic convergence of economic empowerment through the mobilization of savings into insurance products, as well as Afrikaner nationalism, assisted this growth.

Sanlam has played an atypical role in the economic empowerment of an ethnic entity through extensive investments into the industrializing South African economy. This strategic diversion created operational limitations that were only resolved early in the twenty-first century. As globalization, financial deregulation, and weakened Afrikaner political and social hegemony manifested, strategic change management relied on the path dependence of empowerment strategies to address new markets with similar needs to those of the early stakeholder market of 1918. The former mutual life office demutualized operations to become a diversified financial services group of companies operating across

almost the entire African continent, as well as in India, Malaysia, and the UK. This volume presents a business history of strategic management of an insurance enterprise, and its transformation from a defined cultural context into an international empowerment strategy through innovation on all levels of business operation and organization. This book is an Open Access publication, available online under a CC BY-NC-ND 4.0 license.

My Children! My Africa! (TCG Edition)

World Bank Publications

A new addition to the successful telehealth series, Telehealth in the Developing World aims to balance the relative lack of published information on successful telehealth solutions in the developing world.
