MILLS BRYNN

The Alien Adventures of Finn Caspian
#2: the Accidental Volcano Random
House Books for Young Readers
In this fast-paced action adventure, a

paramilitary terrorist group, the Korean Reunification Front, abducts a tour bus of elderly, U.S. Korean War Veterans at Hawaii Volcanoes National Park. The terrorists plant high-explosives in Kilauea Volcano, one of the most active volcanoes in the world. They make their

demands to the U.S. government, threatening to kill the hostages and ignite the explosives in the fault zones of the volcano. This will cause Kilauea to transform into a super volcano and create a mega-tsunami in the Pacific, which will devastate Hawaii coastal areas as well the U.S. West Coast. The U.S. refuses to negotiate and instead calls on their Special Forces to intervene, along with the world's top volcanologist, Dr. Thomas Andrews, to advise them with his in-depth knowledge of Kilauea. Joining him is his geologist wife and their apprentice. Together, they must rescue the hostages and prevent the bombs from being detonated...

Warrior Monkeys and the Volcano Adventure Bonnier Publishing Fiction Ltd.
The ground is shaking. A volcano is

about to erupt. Hundreds of lives are in danger. But you can help! Navigate through three different stories to discover what is happening below Earth's surface. With dozens of story outcomes, it's up to you to stop a volcanic disaster. The planet needs you. Will YOU CHOOSE to help?

Her Epic Adventure JHU Press

Thrilling true stories of female adventurers from around the world. Throughout history, women seeking adventure often faced opposition. But here are 25 remarkable women — from pilots to mountain climbers, deep-sea divers to Antarctic explorers — who defied expectations and made history. Included are Bessie Coleman, famously known as the first Black woman to earn a pilot's license (two years before Amelia

Earhart!). But readers will also learn about lesser-known women, such as Diana Nyad, the first person to swim from Cuba to Florida without a shark cage, and Arunima Sinha, the first woman amputee to climb Mount Everest. Though their experiences are all different, these women have one thing in common: they didn't let anything get in the way of their dreams! Watch out world, the next generation of adventurers are about to get inspired.

Volcano Adventure Cambridge University Press

Charlie loves a challenge he's addicted to video games and an expert at figuring out how to get to the next level. But sometimes the real world can seem a bit dull. Then he finds himself on the slopes of an active volcano, with red-hot lava

heading his way! There's no time to be bored with Bear as his guide out of danger.

Can You Survive a Supervolcano Eruption? Mereo Books, mereobook, mereobooks

On a class trip to Yellowstone National Park, the reader's choices determine if survival is possible after a massive volcano erupts.

Pocket Adventures Guatemala Cambridge University Press

Ms. Adventure tells the story of Jess Phoenix's extraordinary career in geology—and how the barriers she faced along the way inspired her to advocate for more diversity in science.

The Secret Explorers and the Smoking Volcano HarperCollins
We travel to grow - our Adventure

Guides show you how. Experience the places you visit more directly, freshly, intensely than you would otherwise - sometimes best done on foot, in a canoe, or through cultural adventures like art courses, cooking classes, learning the language, meeting the people, joining in the festivals and celebrations. This can make your trip life-changing, unforgettable. All of the detailed information you need is here about the hotels, restaurants, shopping, sightseeing. But we also lead you to new discoveries, turning corners you haven't turned before, helping you to interact with the world in new ways. That's what makes our Adventure Guides unique. Written by a native New Zealander, this guide covers every region and town, with in-depth information on the Maori

culture, the remarkable places to stay and eat, vineyard tours, cooking schools, thermal springs, albatross and whale encounters, scenic drives, and more. Canoe the Whanganui River, ride in a hot air balloon, hike the Waikaremoana Track, explore Whirikana Forest Park, take a glacier tour. There's even a section on how to talk Kiwi English! Photos, maps. Print edition is 622 pages. "The book is great. I love the www references, the personal touches and for me the descriptions and comments make me feel like I am already there." -- Richard Hart. "An activity guide packed with detail on everything from horseback riding and camping to fishing, cruising, hiking and more. Chapters are organized regionally and make it easy to look up local accommodations and eateries,

inland and water adventures, and even small local maps for quick consultation." --Midwest Book Review. "The perfect companion for planning." --Rutgers Magazine. "These useful travel guides are highly recommended." --Library Journal

The Volcano Adventure Guide Hunter Publishing, Inc

Alien Volcanoes Simon and Schuster

The earth explodes in shoots of hot magma, glaciers crash into the ocean,

grotesque creatures lurk in deep caves... follow noted National Geographic explorer and photographer Carsten Peter as he shows us that our precious planet Earth is one wild and extreme place. Tornadoes, ice caves, glaciers, lightning- no territory or phenomenon is too scary for daring explorer Carsten Peter, who is right at home exploring the most outrageous places and raucous natural occurrences around the globe. Kids can follow along as he heads into extreme places and reveals the science and background behind these seemingly unexplainable natural places and phenomenon. Underlying each of his adventures is a dose of hard science, intriguing history, provocative images, tips, gear and gadget advice, and more to help kids learn about the Earth how

they can help preserve the planet.

Ms. Adventure John Wiley & Sons

One of a series of adventure stories featuring Hal and Roger Hunt. The boys are helping Dr Dan Adams to research volcanoes in the Pacific. When Mount Myojin erupts, the doctor's strange behaviour endangers them all as they flee an eruption big enough to devastate a city the size of New York.

Volcano! Capstone Press

There are over 1300 active volcanoes worldwide and many more dormant or extinct. Some are developed as tourist destinations; others are not, but have great potential. Mount Fuji in Japan attracts over 100 million visitors per year and has immense cultural and spiritual significance, while a number of volcanic areas in national parks, for example

Teide in Spain, Yellowstone in the US, Vesuvius in Italy and Tongariro in New Zealand, attract between one to four million tourists each year. In the last decade the designation of nearly 50 geoparks around the world has highlighted their potential for tourism development. This book provides the first global review and assessment of the sustainable use of active and dormant volcanic and geothermal environments for geotourism. The volcano-based tourism sector is further augmented through a closely linked range of geothermal resources and attractions, such as geysers and hot springs, which are discussed in detail throughout individual chapters covering all key volcanic and geothermal regions around the world. It is shown that volcano and

geothermal tourism is a subsection of nature-based geotourism and incorporates a variety of other tourism categories such as adventure tourism, extreme tourism, ecotourism, green tourism, educational tourism, and hot spring tourism. This comprehensive book covers the most important issues of this growing tourism sector whilst incorporating relevant global research, making it an essential resource for all in the field. Includes colour plates.

Modeling Volcanic Processes Hachette Children's

Are you ready for some real adventure? Join Chief Scout Bear Grylls on an exploding volcano . . . Charlie loves a challenge - he's addicted to video games and an expert at figuring out how to get to the next level. But sometimes the real

At Levels 1 to 6, audio is available in CD packs for every reader.

Into the Volcano Routledge

In the early 1970s, Mike Humfreville and his wife Mary Ann left their suburban home and their jobs at NASA's Jet Propulsion Laboratory in Pasadena and headed to Baja California's Bahia de los Angeles. Living in a tiny hut they constructed on a remote beach, they bonded with each and the special place

they'd found. In 1985 they did it again, taking their boys, aged 6 and 8, and living in another beachside hut on the shore of the bay. The family's experiences are related in simple but evocative prose by author Mike Humfreville, who had spent years traveling in Baja California, and reads like a modern-day castaway story—full of adventure and struggle, but with the warmth and humor of a loving family working together on a shared dream. Vacation Under the Volcano Diane & Bill Gleasner Incorporated
At once terrifyingly destructive and awe-inspiringly beautiful, volcanoes have long fascinated humankind. From Vesuvius and Etna to Krakatau and Mount Saint Helen's, these molten rock-and ash-spewing geysers have

destroyed whole cities and countless lives, and altered the course of history. Yet our understanding of volcanoes on Earth—and throughout the celestial world—remains maddeningly incomplete. With *Alien Volcanoes*, Rosaly M. C. Lopes and Michael W. Carroll offer a dynamic tour of volcanic activity across the solar system. Through eight gracefully written chapters laced with gripping photographs and stunning artwork, Lopes and Carroll survey the complete spectrum of volcanism in time and location, from the solar system's origin to the modern era and from the familiar shield volcanoes of the terrestrial worlds to the bizarre superchilled geysers on distant ice moons. In the process, they entertain the possibility of hidden lakes on

Saturn's moon Enceladus, discuss the potential effects of greenhouse gases on Neptune's moon Triton, reconstruct the last moments of life for Pompeiians in the face of an erupting Mount Vesuvius, and explain how a 4,000-mile-long river of lava could have once flowed freely across the plains of Venus. Richly illustrated with original paintings supplemented by NASA and European Space Agency photographs, *Alien Volcanoes* advances our knowledge of volcanoes on other heavenly bodies, enhances our ability to comprehend how they came into being on Earth, and describes how we might better predict the impact of future eruptions.

Extreme Planet Simon and Schuster
The garden fairy from Vermont
continues her adventures in the Big

Island of Hawaii where she befriends forest fairies and a menehune.

The Volcano Challenge National Geographic Books

Buckle up for an explosive adventure! Discover the dramatic power of an erupting volcano in this action-packed sixth installment of DK's new educational fiction series! Meet the Secret Explorers - a band of brainiac kids from all around the world. Everyone in this diverse group of young experts has a specialty, from outer space to dinosaurs, and each story follows a character who gets chosen for a "secret exploration". This edge-of-your-seat science book for kids is packed with:

- Fun facts and illustrations about the Earth's tectonic plates
- Simple and engaging explanations on how volcanoes are formed
- Quizzes, mission notes, and

- a glossary of words with definitions
- Information that supports a STEM-based curriculum

A new adventure unfolds In this fun, fact-filled children's science book, we join volcanoes expert Cheng on an exciting mission to Mount Yasur on the island of Vanuatu.
