True Green Kids Sterling Publishing Company Incorporated

A girl tosses her old homework paper into a recycling bin and the story follows that paper through the process of recycling until it becomes usable paper again.

10 Things You Can Do to Reduce, Reuse, Recycle Little Simon

Kids are on a mission to save the Earth! *Recycle and Remake* is the hands-on, practical guide you need to get started. This gentle, but empowering book is full of creative making activities, information, and ideas that give young eco-warriors (like you!) the know-how to really help the environment. With *Recycle and Remake*, you will soon be saving trees by making your own seeded recycled paper from junk mail, cleaning up the oceans by turning old carrier bags into kites, friendship bracelets, and colorful weaved baskets and repurposing a cardboard box into a periscope. You'll also learn about sustainable energies by creating a simple solar oven, cutting

down on cling-film by making a food wrap from scrap cotton and beeswax, and turning an old t-shirt into a reusable tote bag so you never need to buy a plastic carrier bag again. You can even grow new plants to clean the air in your own upcycled milk bottle planters and using homemade compost. Each of the activities directly relates to an environmental hot topic, such as plastic pollution, food waste, or deforestation. Budding environmentalists all over the world are feeling inspired to do their bit for our unique planet.

**I Can Save the Earth!** Page Street Kids *Crafty Makes* is perfect for those with a creative, crafty streak eager to put their skills to task on recyclable materials in the home. The first in the series, *51 Things to Make with Egg Cartons*, transforms unwanted egg cartons into dinosaurs, monsters, ocean life and much more.

**Nature Craft** Yearling

With *Recycle and Play*, learn how to turn items you already have around the house into fun, engaging, and enriching activities for young learners. Playful learning at home doesn't have to require expensive, specialized toys and

resources. Each activity in *Recycle and Play* uses inexpensive materials such as cardboard, paper tubes, plastic bottles, and egg cartons—materials that might even already be on their way to a landfill—and offers a clear, thoughtful invitation for hours of sensory play at home while reinforcing the importance of reducing waste to benefit the earth. In this book, you'll find tips on how to extend play and learning for each project as well as helpful hints to engage your kids to come up with fun additions and extensions of their own. While each of the 50 projects includes clear step-by-step instructions and materials lists, you should feel free to adjust to your child's interests and the materials you have on hand. Featured learning skills include:

Fine motor skills  
Color recognition  
Sensory exploration  
Letter recognition

Play is a crucial part of a child's cognitive development and is fantastic for sensory exploration, building creativity, and discovery about how things work!

Garbage Land Little Simon

Presents an overview of global warming and describes eighty simple ways to be more environmentally friendly in the bedroom, in the house, at school, and on vacation.

*Tell You What* Crown

Herbie helps out at his grandfather's hardware store, where they discuss reducing, reusing, and recycling, and then take a visit to the recycling center.

*What A Waste* Leisure Arts

Lists numerous suggestions for reusing materials.

Canned and Crushed Random House Value Publishing

It doesn't take a lot to reduce the amount of trash we create. Taking action can be as simple as recycling bottles and cans or bringing reusable bags to the

grocery store. Kids learn this and more about what they can do to help in *100 Things I Can Do to Reduce, Reuse, and Recycle*.

10 Ways to Recycle a Corpse Childs World Incorporated

Keep crafty children of all ages entertained and inspired for hours with Fiona Hayes' *100 Things to Recycle and Make*. Everyday materials are transformed into all kinds of stunning and practical projects, from toy animals and vehicles to dressing-up props, decorations, games, and even fun storage solutions. Bringing together the best projects from the popular *Crafty Makes* series, each section is dedicated to a different base object: cardboard boxes; paper plates; cardboard tubes; materials from nature; and egg cartons. With twenty projects per section to choose from, and 100 projects overall, this book will appeal to a wide range of ages and interests. Simple cardboard tubes become a set of pirate skittles, a friendly octopus, and an entire castle. Plain cardboard boxes are turned into a pirate ship, a money box, and a robot; twigs, leaves and other outdoors materials become picture frames, masks, and a dinosaur. Paper plates make a great bug or flower hat, a dotty frog, and a cute panda, while egg cartons are turned into a fire engine, a pencil holder, and a Christmas tree. Children will be entertained for hours with this invaluable collection of crafty makes, and even the whole family can be involved in recycling everyday objects and turning them into exciting projects. Create entire animal kingdoms and alien worlds, or simply a new favourite toy or mascot. With such a huge range of exciting projects to make from the simplest of objects, *100 Things to Recycle and Make* is the ultimate craft

inspiration for creative children.

Don't Throw That Away! National Geographic Books

Recycle, Reuse, Recraft! Craftcycle is the creative crafter's way to recycling and reusing everyday items destined for the trash or recycling bin. **Recycling at Grandpa's Store** Lerner Digital™

Prepare to be even more revolted, flabbergasted, appalled, and completely entertained by this incredible follow-up collection of absolutely true trivia from the author of 5 People Who Died During Sex. Nothing is too insane, too inane, or too sacred for Karl Shaw's eclectic lists of the world's very worst. DID YOU KNOW... ...that according to recent estimates (2010) your body is worth between \$10,000-\$100,000 on today's open market—from companies legitimately trading body parts from willing donors to recognized medical facilities? ...that the great plague of Athens in 404, which led to the defeat of the Athenians in the Peloponnesian

War, was probably caused by contaminated cereals? ...that Benjamin Franklin liked to sit stark naked in front of his open windows, calling the practice "taking an air bath"? ...that in the last days of his life, the actor Steve McQueen lived on a diet largely comprised of boiled alligator skin and apricot pits, washed down with urine?

**Recycling** Simon and Schuster

It's time to join Team Green. Readers use science to explore ways to be mindful of Earth's environment. Author Robert Gardner guides young readers through many experiments that show readers how waste harms the environment and how to limit their impact. Informative text and projects that employ the scientific method will engage and excite young minds. Readers who are interested in entering science fairs will find additional project ideas.

Craftcycle Turtleback Books

Solid Waste Recycling and Processing, Second Edition, provides best-practice guidance to solid waste managers and recycling coordinators. The book covers all aspects of solid waste processing, volume reduction, and recycling, encompassing typical recyclable materials (paper, plastics, cans, and organics), construction and demolition debris, electronics, and more. It includes techniques, technologies, and programs to help maximize customer participation rates and revenues, as well as to minimize operating costs. The book is packed with lessons learned by the author during the implementation of the most successful programs worldwide, and includes numerous case studies showing how different systems work in different settings. This book also takes on industry debates such as the merits of curbside-sort versus single-stream

recycling and the use of advanced technology in materials recovery facilities. It provides key facts and figures, and brief summaries of legislation in the United States, Europe, and Asia. An extensive glossary demystifies the terminology and acronyms used in different sectors and geographies. The author also explains emerging concepts in recycling such as zero waste, sustainability, LEED certification, and pay-as-you-throw, and places waste management and recycling in wider economic, environmental (sustainability), political, and societal contexts. Covers single- and mixed-waste streams Evaluates the technologies and tradeoffs of recycling of materials vs. integrated solutions, including combustion and other transformational options Covers recycling as part of the bigger picture of solid waste management, processing and disposal

**Fun and Easy Crafting with Recycled Materials** QEB Publishing

Michael Recycle Simon and Schuster Discusses recycling and provides information and instructions for making art projects from a variety of recycled materials.

**51 Things To Make With Egg Cartons** Penguin

A new "green" series!: Little Green Books will educate children on what they can do to be more eco-friendly. The books in this line will be made from recycled materials, and the storylines will cover subjects such as improving the environment, learning about endangered animals, recycling, and much more. Meet Max the Little Monster. He is a cute, furry green monster who is an environmental nightmare. Among other things, he leaves on all the lights, keeps his computer plugged in, blasts the TV, hoards his old toys and uses so much toilet paper it clogs the toilet until finally, his excessive ways cause a power outage. With no TV to watch, computer to play on, video games to play with, Max finds there is a whole big world outside that he can make a difference in the environment. Kids can follow Max the Little Green Monster's journey to environmental awareness and learn tips on how they can become little green monsters themselves. A kid-friendly glossary of terms is included in the back of the book. This 8x8 paperback is perfect bound and will be printed on 100% post-consumer waste recycled paper with soy-ink. The paper is FSC certified.

**From Garbage to Compost** Elsevier Make fun animals and objects from nature's finest materials! Collect twigs, pine cones, feathers, leaves, shells and

pebbles from your garden, park or holiday and create animals and objects with them. Stunning projects include a bird nest bowl made with feathers and leaves, a nut mask and feather mask, seed pod flowers and pine cone owls, a feathery bird bookmark, fir cone fish mobile, painted snail shells and twigs, and a twinkling night light jar. The perfect opportunity to learn about the nature around you whilst being creative, this unique book features over 40 crafty makes and a well-balanced mix of techniques, materials and colours that are great for parents and children to do together.

[Recycled Crafts Box](#) Auckland University Press

When Sandro Zapote finds out his little sister needs heart surgery, he is determined to help his parents raise the money they'll need to help her get better. Sandro's dad is in the states illegally and must work two jobs to support the family. For one, he picks up roadkill for the department of streets and sanitation and gets paid by the carcass. For the other, he collects scrap metal to recycle for cash. Sandro helps his dad with some of the scrap metal heavy lifting, and one headboard, a weight bench, some gutters, and a few car parts later, Sandro has a brilliant idea: can collecting. Save the environment. Save his family. Maybe even save some spending money for the fabulous, fast new bike he's been coveting. Well-meaning and with funny inner monologue, Sandro is the kind of person you can't help but cheer for. He's a boy who loves drawing, soccer, and his little sister. And whether he's fishing a fuzzy, dust-coated turtle out from under his sister's bed or organizing a school-wide can drive all by himself, Sandro is a smart, self-aware hero, who makes just a

few mistakes along the way. Canned and Crushed, by first-time author Bibi, gives Sandro a funny, relatable, readable voice, while being fresh and original. It's a story that will open its readers' eyes, dealing with issues of illegal immigration, unemployment, racism and religious persecution, bullying, and more—carefully and with a light and often humorous touch. This is a cross between *The Absolutely True Diary of a Part-Time Indian* and *Diary of a Wimpy Kid*, and it's a book no kid will want to miss. Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

[Zero Waste Home](#) National Geographic Books

A collection of projects and ideas for making books out of common everyday items normally placed in the recycle bin.

**Follow That Paper!** QEB Publishing

In this informative book on recycling for children, you will find everything you need to know about our environment. The good, the bad, and the incredibly innovative. From pollution and litter to renewable energy and plastic recycling. This educational book will teach young budding ecologists about how our actions affect planet Earth and the big

impact we can make by the little things we do. Did you know that every single plastic toothbrush ever made still exists? Or that there is a floating mass of rubbish larger than the USA drifting around the Pacific Ocean? It is not all bad news though. While this is a knowledge book that explains where we are going wrong, *What a Waste* also shows what we are getting right! Discover plans to save our seas. How countries are implementing green projects worldwide, and how to turn waste into something useful. The tiniest everyday changes can make all the difference to ensure our beautiful planet stays lush and teeming with life. It is a lively kid's educational book with fabulous illustrations and fun facts about the world broken into easy to digest bite-sized bits. Each page can be looked at in short bursts or longer reads for more detail, making it a great children's book for a range of age groups. *Get Involved - Make A Difference!* Almost everything we do creates waste, from litter and

leftovers to factory gases and old gadgets. Find out where it goes, how it affects our planet and what we can do to reduce the problem. From how to make your home more energy and water efficient, to which items can be recycled and tips for grocery shopping, this book is packed full of ideas on how you can get involved to make our planet a better place to live. This environment book for children has a wealth of ideas for becoming a planet-defending hero: - Discover shocking facts about the waste we produce and where it goes - Learn where about our Earth's limited resources and how to take some pressure off - Your trash is another man's treasure - Small changes to take your home from wasteful to super resource efficient - Dive into saving our oceans and super recycling - And much, much more *What a Waste* is one of several nature books for kids written by Jess French, a passionate conservationist and veterinarian committed to protecting the beautiful world we live in.
