Almost everyone has had a moment when they've felt a connection to an animal. Animal communicator Marta Williams says this is the basis of animal communication and it's a skill anyone can develop. Williams's background as a scientist informs her logical step-by-step approach to learning the "language" of animals — a process combining mental imagery, visualization, deep listening, and tuning in to one's intuition. Practical advice and proven techniques are interwoven with inspiring real-life accounts. Williams also discusses ways to use these skills to find lost animals, help animals heal from injury or illness, and explore similar deep connections with nature and the earth.

Thirty years-that's all it took. In those 30 years the Christian church gained sufficient growth and credibility to become the largest religion the world has ever seen and to change the lives of hundreds of millions of people. And it all began with a dozen men, a handful of women, ... and the Holy Spirit. Acts is their story. While it's tempting to think of the early Christian church as the pinnacle of unity, purity, and perfection, this is misleading. Author Wilson Paroschi writes, "We find the early believers, including the apostles, entangled with misconceptions, personal conflicts, prejudice, and several other difficulties typical of human nature. They were not infallible. What they were able to accomplish in such a short period of time, however, is a perpetual testimony of how powerfully God can work when men and women, despite their limitations and failures, humble their hearts in prayer and submit their lives to the control of the Holy Spirit." We should not look at Acts as a retelling of the missionary successes of the apostles but, rather, as an example of the amazing things God was able to accomplish through them in

The foremost contemporary choreographer in the history of ballet, George Balanchine extended the art form into radical new paths that came to seem inevitable under his direction. He transformed movement and dance in classical and modern ballet, on the Broadway stage, and in the cinema. George Balanchine chronicles the life and achievements of this visionary artist from his early, almost accidental career in Russia, where his lifelong collaboration with Igor Stravinsky was forged, to his extraordinary accomplishments in America. The editor and writer Robert Gottlieb, one of the most knowledgeable dance critics in America, offers a superb and loving portrait of a genius who, though married many times to many ballerinas, remained truest to his greatest love, Terpsichore, the Greek Muse of dance.

*Mental Exercises* HarperCollins

A richly illustrated monograph dedicated to one of the most attractive and influential figures of contemporary creation. Loie Fuller was one of the leading and most influential figures of the twentieth-century art scene. Her persona, choreographies, and technical innovations have exerted a strong influence on the conceptual theories and achievements of choreographers, producers, theater and film directors, painters, sculptors, architects, and other performance artists of our times. Loie Fuller played a decisive role in the art nouveau movement, she was the muse who inspired the Electricity Pavilion in 1900, and she orchestrated the first shows, in the contemporary sense of the word, in France. Through a number of photographs, paintings, sculptures, and documents, this volume attempts to unravel the various strands of her extravagant life, to chart her dedication to the performance arts, and to demonstrate her incredible technical inventiveness-in short, to provide an insight into one of the most attractive and influential figures of contemporary creation.

"This little book does a beautiful job of inspiring awe for the capacities of birds and applying lessons from their lives to the struggles of humanity" — Wall Street Journal "Brilliant, magical and engrossing-I will never see birds the same way again." — Peter Wohlleben, author of *The Hidden Life of Trees* THE INTERNATIONAL PHENOMENON Twenty-two short lessons from the secret lives of birds on living harmoniously and reconnecting with nature. This charming volume on bird behavior invites us to take a step back from our busy lives and to listen to the tiny philosophers of the sky. From the delicate sparrow to the majestic eagle, birds are among the most fascinating species on earth, and there is much to be learned from these paragons of beauty and grace that can be applied to our lives, including: Independence: what it means to be "pushed out of the nest."

Vulnerability: what the mallard teaches us about giving up our old feathers for new ones in order to fly. Gender equality: what happens when a papa Turtle dove sits on the nest. Hierarchy and power: what the raven and the vulture know about the pecking order. Filled with elegant illustrations of bird species, this gem of a book celebrates our friends in the sky, and what they can teach us about the rhythms of life.

"A long time ago, Our People came from the Northern Woodlands to the Great Plains looking for food," Grandfather said. "They saw that the Buffalo lived in harmony with Mother Earth the same as Our People did." Through the Creator, the buffalo gave themselves as a gift for the sustenance and survival of the Plains Cree people. The largest land animal in North America once thundered across the Great Plains in numbers of 30 to 50 million. They provided shelter, food, clothing, tools, hunting gear, ceremonial objects and many other necessities for those who lived on the Plains. But by 1889, just over a thousand buffalo remained, and the lives of the Plains Cree people changed. The buffalo is honoured to this day, a reminder of life in harmony with nature as it was once lived. This is the story of how the buffalo came to share themselves so freely.

*Paris Peasant* (1926) is one of the central works of Surrealism. Unconventional in form and fiercely modern, Aragon uses the city of Paris as a framework interlacing text with the city's ephemera: cafe menus, maps, monument inscriptions, newspaper cuttings and the lives of its citizens. No one could have been a more astute detector of the unwanted in all its forms; no one else could have been carried away by such intoxicating reveries about a sort of secret life of the city...'
