How do interventions by the UN Security Council and the International Criminal Court influence representations of mass violence? What images arise instead from the humanitarianism and diplomacy fields? How are these competing perspectives communicated to the public via mass media? Zooming in on the case of Darfur, Joachim J. Savelsberg analyzes more than three thousand news reports and opinion pieces and interviews leading newspaper correspondents, NGO experts, and foreign ministry officials from eight countries to show the dramatic differences in the framing of mass violence around the world and across social fields. Representing Mass Violence contributes to our understanding of how the world acknowledges and responds to violence in the Global South. *Cracking the AP World History Exam* United Nations Publications

Hundreds of mighty tomes have been written about the great colonial years when Britain ruled the waves but perhaps none summed it up so succinctly as this ABC for Baby Patriots first published in 1899. It provides an extraordinary view of the Victorian values and attitudes that made Britain great. *Passport Photos* Routledge

In July 1917, when the Provisional Government issued a warrant for his arrest, Lenin fled from Petrograd; later that year, the October Revolution swept him to supreme power. In the short intervening period he spent in Finland, he wrote his impassioned, never-completed masterwork *The State and Revolution*. This powerfully argued book offers both the rationale for the new regime and a wealth of insights into Leninist politics. It was here that Lenin justified his personal interpretation of Marxism, savaged his opponents and set out his trenchant views on class conflict, the lessons of earlier revolutions, the dismantling of the bourgeois state and the replacement of capitalism by the dictatorship of the proletariat. As both historical document and political statement, its importance can hardly be exaggerated. Translated and edited with an introduction by Robert Service *Documents of Catherine the Great* Univ of California Press

Toussaint L'Ouverture was the leader of the Haitian Revolution in the late eighteenth century, in which slaves rebelled against their masters and established the first black republic. In this collection of his writings and speeches, former Haitian politician Jean-Bertrand Aristide demonstrates L'Ouverture's profound contribution to the struggle for equality.

Although South Asian cookery and gastronomy has transformed contemporary urban foodscape all over the world, social scientists have paid scant attention to this phenomenon. *Curried Cultures*—a wide-ranging collection of essays—explores the relationship between globalization and South Asia through food, covering the cuisine of the colonial period to the contemporary era, investigating its material and symbolic meanings. *Curried Cultures* challenges disciplinary boundaries in considering South Asian gastronomy by assuming a proximity to dishes and diets that is often missing when food is a lens to investigate other topics. The book's established scholarly contributors examine food to comment on a range of cultural activities as they argue that the practice of cooking and eating matter as an important way of knowing the world and acting on it.

Icons of Dissent Princeton Review

America's position as the source of much of the world's global innovation has been the foundation of its economic vitality and military power in the post-war. No longer is U.S. pre-eminence assured as a place to turn laboratory discoveries into new commercial products, companies, industries, and high-paying jobs. As the pillars of the U.S. innovation system erode through wavering financial and policy support, the rest of the world is racing to improve its capacity to generate new technologies and products, attract and grow existing industries, and build positions in the high technology industries of tomorrow. *Rising to the Challenge: U.S. Innovation Policy for Global Economy* emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America's security, its role as a world power, and the welfare of its people. The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage. To this end, both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics. The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States. This report argues that far more vigorous attention be paid to capturing the outputs of innovation - the commercial products, the industries, and particularly high-quality jobs to restore full employment. America's economic and national security future depends on our succeeding in this endeavor.

In rethinking and reframing the American national narrative in a wider context, the contributors to this volume ask questions about both nationalism and the discipline of history itself. The essays offer fresh ways of thinking about the traditional themes and periods of American history. By locating the study of American history in a transnational context, they examine the history of nation-making and the relation of the United States to other nations and to transnational developments. What is now called globalization is here placed in a historical context. A cast of distinguished historians from the United States and abroad examines the historiographical implications of such a reframing and offers

alternative interpretations of large questions of American history ranging from the era of European contact to democracy and reform, from environmental and economic development and migration experiences to issues of nationalism and identity. But the largest issue explored is basic to all histories: How does one understand, teach, and write a national history even as one recognizes that the territorial boundaries do not fully contain that history and that within that bounded territory the society is highly differentiated, marked by multiple solidarities and identities? Rethinking American History in a Global Age advances an emerging but important conversation marked by divergent voices, many of which are represented here. The various essays explore big concepts and offer historical narratives that enrich the content and context of American history. The aim is to provide a history that more accurately reflects the dimensions of American experience and better connects the past with contemporary concerns for American identity, structures of power, and world presence.

Adoption and Multiculturalism features the voices of international scholars reflecting transnational and transracial adoption and its relationship to notions of multiculturalism. The essays trouble common understandings about who is being adopted, who is adopting, and where these acts are taking place, challenging in fascinating ways the tidy master narrative of saviorhood and the concept of a monolithic Western receiving nation. Too often the presumption is that the adoptive and receiving country is one that celebrates racial and ethnic diversity, thus making it superior to the conservative and insular places from which adoptees arrive. The volume's contributors subvert the often simplistic ways that multiculturalism is linked to transnational and transracial adoption and reveal how troubling multiculturalism in fact can be. The contributors represent a wide range of disciplines, cultures, and connections in relation to the adoption constellation, bringing perspectives from Europe (including Scandinavia), Canada, the United States, and Australia. The book brings together the various methodologies of literary criticism, history, anthropology, sociology, and cultural theory to demonstrate the multifarious and robust ways that adoption and multiculturalism might be studied and considered. Edited by three transnational and transracial adoptees, *Adoption and Multiculturalism: Europe, the Americas, and the Pacific* offers bold new scholarship that revises popular notions of transracial and transnational adoption as practice and phenomenon.

In this landmark volume, Alison Brysk has assembled an impressive array of scholars to address new questions about globalization and human rights. Is globalization generating both problems and opportunities? Are new problems replacing or intensifying state repression? How effective are new forms of human rights accountability? These essays include theoretical analyses by Richard Falk, Jack Donnelly, and James Rosenau. Chapters on sex tourism, international markets, and communications technology bring new perspectives to emerging issues. The authors investigate places such as the Dominican Republic, Nigeria, and the Philippines. The contemporary world is defined by globalization. While global human rights standards and institutions have been established, assaults on human dignity continue. These essays identify the new challenges to be faced, and suggest new ways to remedy the costs of globalization.

Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. *Golden Gulag* provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

One-in-seven adults and one-in-five children in the United States live in poverty. Individuals and families living in poverty not only lack basic, material necessities, but they are also disproportionately afflicted by many social and economic challenges. Some of these challenges include the increased possibility of an unstable home situation, inadequate education opportunities at all levels, and a high chance of crime and victimization. Given this growing social, economic, and political concern, The Hamilton Project at Brookings asked academic experts to develop policy proposals confronting the various challenges of America's poorest citizens, and to introduce innovative approaches to addressing poverty. When combined, the scope and impact of these proposals has the potential to vastly improve the lives of the poor. The resulting 14 policy memos are included in The Hamilton Project's Policies to Address Poverty in America. The main areas of focus include promoting early childhood development, supporting disadvantaged youth, building worker skills, and improving safety net and work support.

This open access book provides a concise introduction to a critical development in memory studies. A global memory formation has emerged since the 1990s, in which memories of traumatic histories in different parts of the world, often articulated in the terms established by Holocaust memory, have become entangled, reconciled, contested, conflicted and negotiated across borders. As historical actors and events across time and space become connected in new ways, new grounds for contest and competition arise; claims to the past that appeared de-territorialized in the global memory formation become re-territorialized - deployed in the service of nationalist projects. This poses challenges to scholarship but also to practice: How can we ensure that shared or comparable memories of past injustice continue to be grounds for solidarity between different memory communities? In chapters focusing on Europe, East Asia and Africa, five scholars respond to these challenges from a range of disciplinary perspectives in the humanities.

The global icon is an omnipresent but poorly understood element of mass culture. This book asks why audiences around the world have embraced particular iconic figures, how perceptions of these figures have changed, and what this tells us about transnational relations since the Cold War era. Prestholdt addresses these questions by examining one type of icon: the anti-establishment figure. As symbols that represent sentiments, ideals, or something else recognizable to a wide audience, icons of dissent have been integrated into diverse political and consumer cultures, and global audiences have reinterpreted them over time. To illustrate these points the book examines four of the most evocative and controversial figures of the past fifty years: Che Guevara, Bob Marley, Tupac

Shakur, and Osama bin Laden. Each has embodied a convergence of dissent, cultural politics, and consumerism, yet popular perceptions of each reveal the dissonance between shared, global references and locally contingent interpretations. By examining four very different figures, *Icons of Dissent* offers new insights into global symbolic idioms, the mutability of common references, and the commodification of political sentiment in the contemporary world.

Rethinking American History in a Global Age University of Chicago Press

The U.S.-Mexico Transborder Region presents advanced anthropological theorizing of culture in an important regional setting. Not a static entity, the transborder region is peopled by ever-changing groups who face the challenges of social inequality: political enforcement of privilege, economic subordination of indigenous communities, and organized resistance to domination. The book, influenced by the work of Eric Wolf and senior editor Carlos G. Véllez-Ibáñez, centers on the greater Mexican North/U.S. Southwest, although the geographic range extends farther. This tradition, like other transborder approaches, attends to complex and fluid cultural and linguistic processes, going beyond the classical modern anthropological vision of one people, one culture, one language. With respect to recent approaches, however, it is more deeply social, focusing on vertical relations of power and horizontal bonds of mutuality. Véllez-Ibáñez and Heyman envision this region as involving diverse and unequal social groups in dynamic motion over thousands of years. Thus the historical interaction of the U.S.-Mexico border, however massively unequal and powerful, is only the most recent manifestation of this longer history and common ecology. Contributors emphasize the dynamic "transborder" quality—conflicts, resistance, slanting, displacements, and persistence—in order to combine a critical perspective on unequal power relations with a questioning perspective on claims to bounded simplicity and perfection. The book is notable for its high degree of connection across the various chapters, strengthened by internal syntheses from notable border scholars, including Robert R. Alvarez and Alejandro Lugo. In the final section, Judith Freidenberg draws general lessons from particular case studies, summarizing that "access to valued scarce resources prompts the erection of human differences that get solidified into borders," dividing and limiting, engendering vulnerabilities and marginalizing some people. At a time when understanding the U.S.-Mexico border is more important than ever, this volume offers a critical anthropological and historical approach to working in transborder regions.
