interpret the response and its headers.
As you make your way through the book,
you will write a web crawler using
Python and the Scrapy library. The
book will also help you to develop a tool
to perform brute force attacks in
different parts of the web application.
You will then discover more on detecting
and exploiting SQL injection
vulnerabilities. By the end of this book,

you will have successfully created an HTTP proxy based on the mitmproxy tool.
