This is an exciting period for the book, a time of innovation, experimentation, and change. It is also a time of considerable fear within the book industry as it adjusts to changes in how books are created and consumed. The movement to digital has been taking place for some time, but with consumer books experiencing the transition, the effects of digitization can be clearly seen to everybody. In *Turning the Page* Angus Phillips analyses the fundamental drivers of the book publishing industry - authorship, readership, and copyright - and examines the effects of digital and other developments on the book itself. Drawing on theory and research across a range of subjects, from business and sociology to neuroscience and psychology, and from interviews with industry professionals, Phillips investigates how the fundamentals of the book industry are changing in a world of ebooks, self-publishing, and emerging business models. Useful comparisons are also made with other media industries which have undergone rapid change, such as music and newspapers. This book is an ideal companion for anyone wishing to understand the transition of the book, writing and publishing in recent years and will be particularly relevant to students studying publishing, media and communications.

Winner of the Planning Institute of Australia's 2015 Cutting Edge Research and Teaching Award! Australians from all walks of life have begun to realise the nation's cities cannot sustain profligate growth indefinitely. Dwindling water supplies, failing food bowls, increased energy costs, more severe bushfires, severe storms, flooding, coastal erosion, rising transport expenses, housing shortages and environmental pollution are now daily news headlines. Australia's cities may have reached their ecological limits: a new model for planning the places we live is needed. Understanding the natural cycles of the city is just as important to planning our cities as knowledge of local ordinances, indeed much more so. A profound knowledge of environmental processes is critical for successful planning in today's world. Environmental planners take as their guiding principle the concept of designing with nature, approaching cities as living organisms that consume water, energy and raw materials, and produce waste. This metabolic view of cities means we can find new solutions to old problems, and steer our cities towards a more sustainable form of planning. Written specifically for students and professionals working in city planning in Australia, this ground-breaking new book enables Australian planners, architects and developers to get a better understanding of the fundamental principles of environmental planning for cities, showing how land, water, air, energy, wildlife and people shape our built environments, and how in turn environmental processes must be better understood if we are to make informed decisions about developing cities that are more sustainable. The book's coverage is comprehensive: from an overview of the concepts and theories of environmental planning, through analysis of governance systems and urban environmental processes to agendas and policies for the future, all the key topics are covered in depth, with recommendations for supporting reading and an unrivalled selection of additional materials. Ideal for students, essential for professionals, Australian Environmental Planning is vital reading for more sustainable cities in a more sustainable world.

Remembering the Cold War examines how, more than two decades since the collapse of the Soviet Union, Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe. Given the Cold War's blurred definition - it has neither a widely accepted commencement date nor unanimous conclusion - what is to be remembered? This book illustrates that there is, in fact, a huge body of 'remembrance,' and that it is more pertinent to ask: what should be included and what can be overlooked? Over five sections, this richly illustrated volume considers case studies of Cold War remembering from different parts of the world, and engages with growing theorisation in the field of

memory studies, specifically in relation to war. David Lowe and Tony Joel afford careful consideration to agencies that identify with being 'victims' of the Cold War. In addition, the concept of arenas of articulation, which envelops the myriad spaces in which the remembering, commemorating, memorialising, and even revising of Cold War history takes place, is given prominence.

This timely volume explores the signal contribution George Saunders has made to the development of the short story form in books ranging from *CivilWarLand in Bad Decline* (1996) to *Tenth of December* (2013). The book brings together a team of scholars from around the world to explore topics ranging from Saunders's treatment of work and religion to biopolitics and the limits of the short story form. It also includes an interview with Saunders specially conducted for the volume, and a preliminary bibliography of his published works and critical responses to an expanding and always exciting creative oeuvre. Coinciding with the release of the Saunders' first novel, *Lincoln in the Bardo* (2017), *George Saunders: Critical Essays* is the first book-length consideration of a major contemporary author's work. It is essential reading for anyone interested in twenty-first century fiction.

Nothing So Glorious (Cris De Niro, Book 5) McFarland

Roger Storm has it all: money, a beautiful fiancée, and a career as an advertising executive for a major airline. But when a mysterious stranger dressed in a 1940s train porter's uniform convinces him to restore the Santa Fe Super Chief, America's most famous old luxury train, for one last run from Chicago to Los Angeles, Roger's life will never be the same. Given a guest list and orders to arrange for all of the expenses out of his own pocket, Roger will risk certain financial ruin in order to find out shocking revelations about his own life and attain a happiness he never knew was missing. *Field of Dreams* meets *An Affair to Remember* on a mystical train ride. Infused with a magical realism and spirituality that is missing from most books, this is a truly touching novel that opens our eyes to the sometimes supernatural forces that mysteriously and unexpectedly give us glimpses of heaven while providing healing and hope. With an endearing urge to touch readers in a way that few novels can, author Douglas Folsom does an excellent job of making readers actually experience the underlying message in his heartwarming tale. Genre: Magical Realism, Mystery, Romance, Spiritual. Tone: Heartwarming, Inspirational, Romantic, and Nostalgic.

Cofounder of *Fast Company* magazine and bestselling author of *Mavericks at Work* and *Practically Radical* shows how true business innovation can spring from the unlikelyst places. Far away from Silicon Valley, in familiar, traditional, even unglamorous fields, ordinary people are unleashing extraordinary advances that amaze customers, energize employees, and create huge economic value. Their secret? They understand that the work of inventing the future doesn't just belong to geeks designing mobile apps and virtual-reality headsets, or to social-media entrepreneurs hoping to launch the next Facebook. Some of today's most compelling organizations are doing brilliant things in simple settings such as retail banks, office cleaning companies, department stores, small hospitals, and auto dealerships. William C. Taylor, cofounder of *Fast Company* and best-selling author of *Practically Radical*, traveled thousands of miles to visit these hotbeds of simple brilliance and unearth the principles and practices behind their success. He offers fascinating case studies and powerful lessons that you can apply to do ordinary things in extraordinary ways, regardless of your industry or profession. Consider, for instance, how... ·Miami Beach's dazzling 1111 Lincoln Road reimaged the humble parking garage as a high-profile public space that hosts weddings, yoga classes, and celebrity gatherings. ·USAA, the financial-services giant that provides soldiers and their families with insurance and banking products, inspires frontline employees to deliver legendary service by immersing them in military culture. ·Pal's Sudden Service, a fast-food chain with a cult following, serves up burgers and fries with such speed and accuracy that companies from other industries pay to learn from its astonishing discipline. ·Lincoln Electric, a manufacturer based in Euclid, Ohio, dominates its ultracompetitive markets with a fierce devotion to quality and productivity. But the key to its prosperity is a share-the-wealth model that gives everybody a sense of security and a piece of the action. It has maintained a strict no-layoff pledge since 1958. As Taylor writes: "The story of this book, its message for leaders who aim to do something important and build something great, is both simple and subversive: In a time of wrenching disruptions and exhilarating advances, of unrelenting turmoil and unlimited promise, the future is open to everybody. The thrill of breakthrough creativity and breakaway performance . . . can be summoned in all sorts of industries and all walks of life, if leaders can reimagine what's possible in their fields." *Simply Brilliant* shows you how.

Television's *Community* follows the shenanigans of a diverse group of traditional and nontraditional community college students: Jeff Winger, a former lawyer; Britta Perry, a feminist; Abed Nadir, a pop culture enthusiast; Shirley Bennett, a mother; Troy Barnes, a former jock; Annie Edison, a naive overachiever; and Pierce Hawthorne, an old-fashioned elderly man. There are also Benjamin Chang, the maniacal Spanish teacher, and Craig Pelton, the eccentric dean of Greendale Community College, along with well-known guest stars who play troublemaking students, nutty professors and frightening administrators. This collection of fresh essays familiarizes readers not only with particular characters and popular episodes, but behind-the-scenes aspects such as screenwriting and production techniques. The essayists explore narrative theme, hyperreality, masculinity, feminism, color blindness, civic discourse, pastiche, intertextuality, media consciousness, how *Community* is influenced by other shows and films, and how fans have contributed to the show.

Lady Philippa Marbury is . . . odd The brilliant, bespectacled daughter of a double marquess cares more for books than balls, for science than the season, and for laboratories than love. She's looking forward to marrying her simple fiancé and living out her days quietly with her dogs and her scientific experiments. But before that, Pippa has two weeks to experience all the rest—fourteen days to research the exciting parts of life. It's not much time, and to do it right she needs a guide familiar with London's darker corners. She needs . . . a Scoundrel She needs Cross, the clever, controlled partner in London's most exclusive gaming hell, with a carefully crafted reputation for wickedness. But reputations often hide the darkest secrets, and when the unconventional Pippa boldly propositions him, seeking science without emotion, she threatens all he works to protect. He is tempted to give Pippa precisely what she wants . . . but the scoundrel is more than he seems, and it will take every ounce of his willpower to resist giving the lady more than she ever imagined.

How to better manage systemic risks—from cyber attacks and pandemics to financial crises and climate change—in a globalized world *The Butterfly Defect* addresses the widening gap between the new systemic risks generated by globalization and their effective management. It shows how the dynamics of turbo-charged globalization has the potential and power to destabilize our societies. Drawing on the latest insights from a wide variety of disciplines, Ian Goldin and Mike Mariathasan provide practical guidance for how governments, businesses, and individuals can better manage globalization and risk. Goldin and Mariathasan demonstrate that systemic risk issues are now endemic everywhere—in supply chains, pandemics, infrastructure, ecology and climate change, economics, and politics. Unless we address these concerns, they will lead to greater protectionism, xenophobia, nationalism, and, inevitably, deglobalization, rising inequality, conflict, and slower growth. *The Butterfly Defect* shows that mitigating uncertainty and risk in an interconnected world is an essential task for our future.

Alan Moore and Dave Gibbons's *Watchmen* has been widely hailed as a landmark in the development of the graphic novel. It was not only aesthetically groundbreaking but also anticipated future developments in politics, literature, and intellectual property. Demonstrating a keen eye for historical detail, *Considering Watchmen* gives readers a new appreciation of just how radical Moore and Gibbons's blend of gritty realism and formal experimentation was back in 1986. The book also considers *Watchmen*'s place in the history of the comics industry, reading the graphic novel's playful critique of superhero marketing alongside Alan Moore's public statements about the rights to the franchise. Andrew Hoberk examines how Moore and Gibbons engaged with the emerging discourses of neoconservatism and neoliberal capitalism, ideologies that have only become more prominent in subsequent years. *Watchmen*'s influences on the superhero comic and graphic novel are undeniable, but Hoberk reveals how it has also had profound effects on literature as a whole. He suggests that *Watchmen* not only proved that superhero comics could rise to the status of literature—it also helped to inspire a generation of writers who are redefining the boundaries of the literary, from Jonathan Lethem to Junot Díaz.

Hoberk delivers insight and analysis worthy of satisfying serious readers of the genre while shedding new light on *Watchmen* as both an artistic accomplishment and a book of ideas.

The Return of the Santa Fe Super Chief FT Press

This collection of new essays examines how authors of the 20th and 21st centuries continue the use of sentimental forms and tropes of 19th century literature. Current literary and cultural critical consensus seems to maintain that Americans engaged in a turn-of-the-century refutation of the sentimental mode; an analysis of 20th and 21st century narratives, however, reveals an ongoing use of sentimental expression that draws upon its ability to instruct and influence readers through their emotions. While these later narratives employ aspects of the sentimental mode, many of them also engage in a critique of the failures of the sentimental, deconstructing 19th century perspectives on race, class and gender and the ways they are promoted by sentimental ideals.

The *Interlaw* book on Renewable Energy is a comprehensive overview of renewable energy policies and developments in the major countries active in the field. It addresses, in a practical and legal perspective, the main interrogations encountered by investors and policy makers on how to efficiently deploy renewable energy, particularly in terms of support schemes, grid connection costs, priority and congestion rules or permitting.

The Definitive Guide to Entertainment Marketing Routledge

This book offers a novel and productive explanation of why 'ordinary' people can be moved to engage in destructive mass violence (or terrorism and the abuse of rights), often in large numbers and in unexpected ways. Its argument is that narratives of insecurity (powerful horror stories people tell and believe about their world and others) can easily make extreme acts appear acceptable, even necessary and heroic. As in action or horror movies, the script dictates how the 'hero' acts. The book provides theoretical justifications for this analysis, building on earlier studies but going beyond them in what amount to a breakthrough in mapping the context of mass violence. It backs its argument with a large number of case studies covering four continents, written by prominent scholars from the relevant countries or with deep knowledge of them. A substantial introduction by the UN's Special Advisor on the Prevention of Genocide demonstrates the policy relevance of this path-breaking work.

Energy risk has reappeared on the corporate and social agenda with a bang and the complexity of the issues has increased many-fold since the days of the last great wave of concern following the oil crises of the 1970s. Steven Fawkes' *Energy Efficiency* is a comprehensive guide for managers and policy-makers to the fundamental questions underpinning energy-efficiency and our responses to it: ¶ what do we really mean by energy efficiency? ¶ what is the potential (in different dimensions)? ¶ why it is important? ¶ what management processes lead to optimisation of energy efficiency? ¶ what technologies are useful for improving energy efficiency? ¶ what policies can be used to promote energy efficiency? ¶ how can energy efficiency be financed? ¶ how can energy suppliers engage with energy efficiency? The result is the most comprehensive review to-date of the barriers and opportunities associated with improving energy efficiency. Clearly written and erudite, Steven Fawkes addresses every aspect of energy efficiency, including the huge and vitally important untapped potential offered by effective energy management and the application of existing technology. He also identifies barriers, such as the rebound effect and how they can be mitigated and he provides a comprehensive review of innovative energy efficiency financing options. This book is a 'must read' for anyone with an interest in energy supply and demand reduction.

This book makes a new and significant argument that Indian news media are no longer just observers but active participants in the events that direct the nation. It explores the changing role and performance of Indian news media in the past 25 years by examining their coverage of some of the landmark events and issues within the context of the India's 'globalising' polity, increased privatisation, new communication technologies and the rise of individualism. The challenges of globalisation have resulted in significant changes in news processes and procedures, which this volume details by scrutinising the media's reportage of several events and issues, such as anti-graft movement, paid news, sting journalism, 24-hour news and coverage of terrorism and politics-media nexus. The theoretical exploration of the changes in the Indian media landscape draws from academic disciplines of media studies, journalism, cultural studies, political science and sociology.
