Beautifully presented and intelligently paced, the Lesson Book combines unusually attractive music and lyrics. The book features note reading, rhythm reading, sight-reading and technical workouts. While most teachers find audio recordings very useful at the lesson and for home practice, others prefer not to use

the audio. To accommodate all teachers, this version of Alfred's Premier Piano Course Lesson Book 2A does not have audio included.

This book resulted from lectures which I gave at the Universities of Kyoto, Cologne, and Bonn. Its objective is to summarize in a unifying way two other wise rather separately treated subjects of atmospheric electrodynamics: electric fields of atmospheric origin, in particular thunderstorm phenomena and related problems on the one hand, and magnetic fields, in particular those which are associated with electric currents of upper atmospheric origin, on the other. Geoelectricity and geomagnetism were not always considered as belonging to quite different fields of geophysics. On the contrary, they were recognized by the physicists of the 19th and the beginning of the 20th century as two manifestations of one and the same physical phenomenon, which we presently refer to as electromagnetic fields. This can still be visualized from the choice of names of scientific journals. For instance, there still exists the Japanese Journal of Geomagnetism and Geoelectricity, and the former name of the present American Journal of Geophysical Research was Terrestrial Magnetism and Atmospheric Electricity. Whereas geomagnetism became the root of modern magnetospheric physics culminating in the space age exploration of the earth's environment, geoelectricity evolved as a step-child of meteorology. The reason for this is clear. The atmospheric electric field observed on the ground reflects merely the local weather with all its frustrating unpredictability. The variable part of the geomagnetic field, however, is a useful indicator of ionospheric and magnetospheric electric current systems.

Teach viola with the popular Suzuki Viola School. The Suzuki Method(R) of Talent Education is based on Shinichi Suzuki's view that every child is born with ability, and that people are the product of their environment. According to Shinichi Suzuki, a world-renowned violinist and teacher, the greatest joy an adult can know comes from developing a child's potential so he/she can express all that is harmonious and best in human beings. Students are taught using the mother-tongue approach. Each series of books for a particular instrument in the Suzuki Method is considered a Suzuki music school, such as the Suzuki Viola School. Suzuki lessons are generally given in a private studio setting with additional group lessons. The student listens to the recordings and works with their Suzuki Viola teacher to develop their potential as a musician and as a person. This Suzuki book, Volume 2, is integral for Suzuki viola lessons. Few literary phenomena are as elusive and yet as persistent as realism. While it responds to the perennial impulse to use literature to reflect on experience, it also designates a specific set of literary and artistic practices that emerged in response to Western modernity. Landscapes of Realism is a two-volume collaborative interdisciplinary exploration of this vast territory, bringing together leading-edge new criticism on the realist paradigms that were first articulated in nineteenth-century Europe but have since gone on globally to transform the literary landscape. Tracing the manifold ways in which these paradigms are developed, discussed and contested across time, space, cultures and media, this first volume tackles in its five core essays and twenty-five case studies such questions as why realism emerged when it did, why and how it developed such a transformative dynamic across languages, to what extent realist poetics remain central to art and popular culture after 1900, and how generally to reassess realism from a twenty-first-century comparative perspective.

Louis R. Feuillard (1872-1941) has become known chiefly as the teacher of Paul Tortelier who called him a man with an extraordinary educational instinct. His 'Daily Exercises' take up the most important aspects of the cello technique, such as exercises in neck and thumb positions, double stops and bowing

exercises. It is particularly because of the logical structure of the exercises that they have been among the standard works of violoncello study literature since their publication in 1919.
