Empowerment is the overarching idea used in this book. The term has a variety of meanings in different sociocultural and political contexts, including "self-strength, control, self-power, self-reliance, own choice, life of dignity in accordance with one's values, capable of fighting for one's rights, independence, own decision making, being free, awakening, and capability" (The World Bank, 2002, p. 10). However, the World Bank report observed that most definitions focus on issues of "gaining power and control over decisions and resources that determine the quality of one's life" (p. 10). This interpretation of empowerment provides a useful starting point for the development of the series of interconnected arguments explored here. Establishment of the basis for understanding, identifying and developing strategies through education necessary for individuals to be able to make choices that influence the quality of their lives is the main aim of this book. There are a number of assumptions and boundaries that frame this analysis. First, the book focuses on "agents"; however, empowerment is often conceptualised in terms of relationships between agency and structure (e. g. , Alsop, Bertelsen, & H- land, 2006). Agency could be defined as "an actor's or group's ability to make purposeful choices – that is, the actor is able to envisage and purposively choose options" (p. 11).

This book is a practical guide to discovering and exploiting security flaws in web applications. The authors explain each category of vulnerability using real-world examples, screen shots and code extracts. The book is extremely practical in focus, and

describes in detail the steps involved in detecting and exploiting each kind of security weakness found within a variety of applications such as online banking, e-commerce and other web applications. The topics covered include bypassing login mechanisms, injecting code, exploiting logic flaws and compromising other users. Because every web application is different, attacking them entails bringing to bear various general principles, techniques and experience in an imaginative way. The most successful hackers go beyond this, and find ways to automate their bespoke attacks. This handbook describes a proven methodology that combines the virtues of human intelligence and computerized brute force, often with devastating results. The authors are professional penetration testers who have been involved in web application security for nearly a decade. They have presented training courses at the Black Hat security conferences throughout the world. Under the alias "PortSwigger", Dafydd developed the popular Burp Suite of web application hack tools.

Praktikumsbericht / -arbeit aus dem Jahr 2021 im Fachbereich Didaktik - Deutsch - Literatur, Werke, Note: 1,0, Freie Universität Berlin (Geisteswissenschaften), Veranstaltung: Schulpraktische Studien Deutsch, Sprache: Deutsch, Abstract: Meine Lerngruppe wurde mitunter die 10 XN, mit der schließlich Goethes Faust zu ergründen war. Meine Unterrichtsvorbereitungen gliederten sich in theoretische Vorüberlegungen zur Gruppe während der Hospitation und in praktische Anwendungen im Anschluss. Die Vorüberlegungen schienen notwendig, da sie in die praktische Anwendung einfließen sollten. Die Lerngruppe wurde etwa vier

Wochen beobachtet, dabei wurden institutionellen Rahmenbedingungen der Vermittlungssituation (der Mentorin Frau XY) so genau wie möglich zu erfassen versucht. Dabei konzentrierten sich die Vorüberlegungen auf die Fragen, welche besonderen Fälle, Phänomene, Situationen, Versuche, Modelle, Bilder, Materialien, Handlungen geeignet sind, den Inhalt für Kinder dieser Lerngruppe besonders interessant, zugänglich, anschaulich, begreiflich oder fragwürdig zu machen. Die Klasse 10 XN ist seit September 2020 durch wöchentliche Hospitationsstunden bekannt und setzt sich aus 24 SuS zusammen. Die SuS dieser Klasse beteiligen sich ausreichend am Unterricht, jedoch fehlt ihnen manchen Tags der Enthusiasmus. Die Mädchen beteiligen sich in höherem Maße als die Jungen, die mit Stärke von 15 Personen deutlich überwiegen. Die Klasse 10 XN ist zudem vorzugsweise diszipliniert und Unterrichtsstörungen sind eher eine Seltenheit. Die Unterrichtsbeteiligung ist unterschiedlich, aber stabil und konstant vorhanden. Die SuS haben ein Alter zwischen 14 und 16 Jahren und lassen sich hinsichtlich ihrer Leistungsfähigkeit motivieren.

Modern Operating Systems Addison Wesley Longman

"The debate over the extent of Jewish influence upon early Christianity rages on. At the heart of this argument lies the question of Jesus: how does the fate of a first-century Galilean Jew inspire and determine the nature, shape, and practices of a distinct religious movement? Vital to this first question is another equally challenging one: can the four Gospels be used to reconstruct the historical Jesus? In Jesus and Judaism, Martin Hengel and Anna Maria Schwemer seek to untangle the complex

relationships among Jesus, Judaism, and the Gospels in the earliest Christian movement. Jesus and Judaism, the first in a four-volume series, focuses on the person of Jesus in the context of Judaism. Beginning with his Galilean origin, the volume analyzes Jesus' relationship with John the Baptist and the Jewish context of Jesus' life and work. Hengel and Schwemer argue that there never was a nonmessianic Jesus. Rather, his messianic claim finds expression in his relationship to the Baptist, his preaching in authority, his deeds of power, and his crucifixion as king of the Jews, and in the emergence of the earliest Christology. As Hengel and Schwemer reveal, Jesus was not only a devout Jew, nor merely a miracle worker, but the essential part of the earliest form of Christianity. Hengel and Schwemer insist that Jesus belongs within the history of early Christianity, rather than as its presupposition. Christianity did not begin after Jesus' death; Christianity began as soon as a Jew from Galilee started to preach the word of God."--

Sabine Michalowski's work provides a much-needed legal perspective on the topical subject of Developing World debt repayment. The volume incorporates a single debtor country, Argentina, as an example to address global questions relating to this problem. The work assesses the range of complex issues involved in the context of international as well as national law. It further examines the political pressure creditors may apply to make vulnerable countries adapt their economic and other

policies in line with their wishes. These raise obvious constitutional issues for the debtor country and pose questions of whether and how the inequality of bargaining power in such situations could influence the validity of any measures taken, whether contractual or legislative. Argentina has been chosen as a case study because as a large debtor country, it represents these sorts of issues.
