*Fun for Flyers Student's Book* Springer Nature

This open access book analyses migration and its relation to socio-political transformation in Switzerland. It addresses how migration has made new forms of life possible and shows how this process generated gender innovation in different fields: the changing division of work, the establishment of a nursery infrastructure, access to higher education for women, and the struggle for female suffrage. Seeing society through the lens of migration alters the perspective from which our past and thus our present is told—and our future imagined.

**Taming Your Gremlin (Revised Edition)** Assimil GmbH

This open access book examines everyday practices in an asylum administration. Asylum decisions are often criticised as being 'subjective' or 'arbitrary'. Asylum Matters turns this claim on its head. Through the ethnographic study of asylum decision-making in the Swiss Secretariat for Migration, the book shows how regularities in administrative practice and 'socialised subjectivity' are produced. It argues that asylum caseworkers acquire an institutional habitus through their socialisation on the job, making them 'carriers' of routine practices. The different chapters of the book deal with what it means to methodologically study administrative practice: with how asylum proceedings work in Switzerland and with the role different types of knowledge play in overcoming the uncertainties inherent in refugee status and credibility determination. It sheds light on organisational socialisation processes and on the professional norms and values at the heart of administrative work. By doing so, it shows how disbelief becomes normalised in the office. This book speaks to legal scholars, sociologists, anthropologists, human geographers and political scientists interested in bureaucracy, asylum law, migration studies and socio-legal studies, and to NGOs working in the field of asylum.

The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

Amma, universally known as "The Hugging Saint," went through a two-decade transformation from a simple fisherman's daughter to an international wonder worshiped by millions. Gail "Gayatri" Tredwell was there every step of the way--from early devotee to head female disciple, ever-present personal attendant, handmaiden, whipping post, and unwilling keeper of some devastating secrets. Because she became fluent in the Malayalam language and had continual intimate proximity to Amma for twenty years, Tredwell is uniquely capable of portraying this famous woman. She tells her tale with straightforward honesty, fairness, and a dash of Aussie snap and wit. Although the guru's flaws are a necessary part of her story and awakening, she strives to be factual throughout, digging deep to eschew victim frameworks and take responsibility for her own

role in accepting the abuse and perpetuating the lies. Tredwell takes us vividly through her varying stages, starting with naïveté and innocent devotion, then on to dawning awareness and confusion, finally to emotional breakdown and her shocking "enlightenment"--her realization that the liberation she urgently required was in fact liberation from her own guru

Identities and social relations are fundamental elements of societies. To approach these topics from a new and different angle, this study takes the human body as the focal point of investigation. It tracks changing identities of early Iron Age people in central Europe through body-related practices: the treatment of the body after death and human representations in art. The human remains themselves provide information on biological parameters of life, such as sex, biological age, and health status. Objects associated with the body in the grave and funerary practices give further insights on how people of the early Iron Age understood life and death, themselves, and their place in the world. Representations of the human body appear in a variety of different materials, forms, and contexts, ranging from ceramic figurines to images on bronze buckets. Rather than focussing on their narrative content, human images are here interpreted as visualising and mediating identity. The analysis of how image elements were connected reveals networks of social relations that connect central Europe to the Mediterranean. Body ideals, nudity, sex and gender, aging, and many other aspects of women's and men's lives feature in this book. Archaeological evidence for marriage and motherhood, war, and everyday life is brought together to paint a vivid picture of the past.

*Project Management at the Edge of Chaos* Cambridge University Press

Complexity is a gift that can be made available for the successful implementation of projects, and used to create a new order or to change an existing one. Based on scientific facts, the authors present a systematic approach, which integrates complexity and its multitude of facets and gives practical recommendations for dealing with complexity in projects. The methods paradigm in project management is currently undergoing a massive upheaval. Projects are complex entities that cannot be tackled using traditional methods, such as classical cause and effect approaches. Complexity, and the associated phenomenon of self-organization, is a natural, but hidden designer. It offers a great opportunity in its use as a key driver for the implementation of projects. This requires identification of the principles of complexity and then using these for project management. In this book, the latest findings from natural sciences and brain research are used and transferred within a practice-oriented framework. The authors describe the methods of complexity regulation in projects and how self-organization for the management of projects can be applied.

*Players Making Decisions* Council of Europe

Drawing on new research material from ten European countries, Asylum Determination in Europe: Ethnographic Perspectives brings together a range of detailed accounts of the legal and bureaucratic processes by which asylum claims are decided. The book includes a legal overview of European asylum determination procedures, followed by sections on the diverse actors involved, the means by which they communicate, and the ways in which they make life and death decisions on a daily basis. It offers a contextually rich account that moves beyond doctrinal law to uncover the gaps and variances between formal policy and legislation, and law as actually practiced. The contributors employ a variety of disciplinary perspectives - sociological, anthropological, geographical and linguistic - but are united in their use of an ethnographic methodological

approach. Through this lens, the book captures the confusion, improvisation, inconsistency, complexity and emotional turmoil inherent to the process of claiming asylum in Europe.
