the present. Integrating new scholarship with the historical record, the fifth edition of *A Concise History of Australia* brings together the long narrative of Australia's First Nations' peoples; the arrival of Europeans and the era of colonies, convicts, gold and free settlers; the foundation of a nation state; and the social, cultural, political and economic developments that created a

modern Australia. As we enter the third decade of the twenty-first century, Macintyre's *Australia* remains one of achievements and failures. So too the future possibilities are deeply rooted in the country's past endeavours. *A Concise History of Australia* is an invitation to examine this past.

Learning to Teach in England and the United States studies

the evolution of initial teacher education by considering some of the current approaches in England and the United States. Presenting empirical evidence from these two distinct political and historical contexts, the chapters of this thought-provoking volume illustrate the tensions involved in preparing teachers who are working in ever-changing environments. Grounded in

the lived experiences of those directly affected by these shifting policy environments, the book questions if reforms that have introduced accountability regimes and new kinds of partnership with the promise of improving teaching and learning, have contributed to more powerful learning experiences in schools for those entering the profession. The authors consider the relationships

between global, national and local policy, and question their potential impact on the future of teacher education and teaching more generally. The research adopts an innovative methodology and sociocultural theoretical framework designed to show greater insights into the ways in which beginning teachers' learning experiences are shaped by relationships at all of these

levels. A key emerging issue is that of the alignment – or not – between the values and dispositions of the individuals and the institutions that are involved. This book will appeal to academics, researchers and postgraduate students in the fields of teacher education, comparative education, higher education, and education policy and politics.
