The Story of the Little Piggy Who Couldn't Say No Independently Published

This volume presents a line of original experimental studies on the bodily self, investigating where people locate themselves in their bodies and how accurate they are at localizing their body parts. So far, it was not well known whether people locate themselves in one or more specific regions of their bodies. On the other hand, some systematic distortions in indicating bodily locations were already documented. In the present studies, participants were therefore asked to indicate their self-locations, as well as the locations of several of their body parts, using a self-directed, first-person perspective pointing paradigm in various virtual reality (VR) setups (different head-mounted displays and a large-screen immersive display). Overall, participants were found to locate themselves mainly in the (upper) face and the (upper) torso. However, striking differences in self-localization were found when testing in different VR setups. Upon further investigation, these differences were found to be foremost due to inaccuracies in body part localization. When taking these inaccuracies into account, differences between setups—and also with self-localization outside of VR—largely disappear. Another striking finding was that providing participants—in between pointing phases—with information about their bodies in the form of a real-time animated self-avatar, did not make them more accurate at locating their own body parts. While manipulating their viewpoint to chest-height of their self-avatar did shift the afterwards indicated locations of their own body parts upwards, towards where they were seen on the avatar. Potential explanations for the various new findings, also from tasks outside of VR, are discussed. Taken together, this volume suggests a differential involvement of multi-sensory information processing in experienced self-location within the body and the ability to locate body parts. Self-localization seems to be less flexible, possibly because it is strongly grounded in the 'bodily senses', while body part localization appears more adaptable to the manipulation of sensory stimuli, at least in the visual modality.

The Secret Hideout Minedition

Justice is considered the basic norm of human coexistence. Every legal order refers to the concept of justice, and Muslims also regard their religious norms (the Sharia) as offering just solutions to legal questions. But is the assumption that the Sharia is just merely an acceptance of a status quo correct? And is justice the necessary aim of the Sharia? In this volume, renowned scholars discuss these questions from different perspectives. In principle, the first normative source of Islam, the Qur'an, orders justice and fair conduct (Rohe). At the same time, an analysis of the concept of justice in the classical age of Islam (Ahmed and Poya) also shows that there existed ambivalent understandings of this concept. The relationship of the idea of justice in Islam to political questions (Ende), to war (Poya), and to modern reform (Mir-Hosseini) again confirms the importance of the concept for a critical reflection on traditional assumptions and existing circumstances. The discussion on the hijab in Western countries (Ladwig) shows paradigmatically how justice can regulate the relationship between the secular state and the Sharia. The essays in this volume endeavor to show that debates about justice, in Islam as well, express an underlying tension between the perception of an order as just on the one hand, and the feeling of injustice under the same order on the other. This discussion validates the idea that justice should be understood as a concept subject to a perpetual reexamination according to changing times and circumstances.

Presented from the perspectives of a former FBI profiler and a forensic violence-risk expert, *Profiling Violent Crime: A Behavioral and Forensic Approach* educates readers about the nature of criminal profiling including how it works, the techniques it draws on, the types of offenders it applies to, and the psychological make-ups of those offenders. Drawing from technique, as well as from theory and

the latest clinical research, *Profiling Violent Crime* delves into precisely what it means to profile. Students learn what it's like to be on the ground as an FBI profiler, dispelling myths and detailing the actual process. Subsequent chapters detail crime scene analysis; determination of the type of offender that may be at work; the fascinating interplay between mental illness and criminality; and breakdowns of the various types of criminal offenders including stalkers, murderers, rapists, mass murderers, and serial killers. The book also offers multiple real-life case examples to shed light further into the criminal mind. Rooted in the authors' personal experience in law enforcement and forensic psychology *Profiling Violent Crime* is an excellent text for courses in criminal justice, psychological profiling, and forensic psychology. It provides readers with real, intimate insight into criminal profiling, addressing its strengths and drawbacks, as well as offering a glimpse of where this crucial field has yet to go. Peter M. Klismet, Jr. holds a master's degree in criminal justice from California Lutheran University and another in public administration from the University of Southern California. He is a former agent with the Federal Bureau of Investigation, and was one of the first formally-trained psychological profilers within the Agency. He served in law enforcement for over thirty years before joining the faculty at Pikes Peak Community College as an associate professor of criminal justice, going on to chair the department. He is now the founder and director of Criminal Profiling Associates, a law enforcement consulting company. Dr. Clarissa Cole received her master's and doctoral degrees in clinical psychology from Baylor University, and began her career by working at Napa State Hospital. More than a decade ago, she transferred to the California Department of Corrections and Rehabilitation. Currently, she is a senior forensic psychologist in an experimental program--the first of its kind, in the United States--wherein she supervises violence-risk assessments for the Board of Parole Hearings. Along with specializing in violence risk, Dr. Cole co-hosts a weekly true-crime radio show, and maintains her own blog/opinion page.

Where are you? Self- and body part localization using virtual reality setups Simon and Schuster

The question of how theology shapes a Christian historian's reading of the past has been debated thoroughly in various academic periodicals. Should historians recognise the role of providence in their accounts of past events? Should they sympathise with their subject's theology? Can objectivity be lost due to theological bias? And, last but not least, is there a compromise of faith if one writes "natural" instead of "supernatural" history? Such questions are important for understanding the historian's profession. Arnold Dallimore, who trained and specialised in pastoral ministry in Canada, wrote an influential biography of the revivalist George Whitefield, as well as others on Charles and Susanna Wesley, Edward Irving, and Charles Spurgeon. How did his Reformed theological perspective impact his historiography? How does his work fit into larger historiographical debates concerning the nature of Christian history? While other books look at Christian historiography using abstract and methodological approaches, this book examines the subject precisely by looking at the life and work of an individual historian. It does so by placing Dallimore in the context of being a minister in twentieth-century Canada as well as his role in the development of Reformed Theology in the Anglosphere. It also examines the quality of his various biographies focusing on key issues such as the nature of religious revival, the problem of Christianity and slavery, and the question of charismatic religious experience. His study concludes by examining the relationship between the discipline and profession of church history and asking what is required for one to be considered a

church historian.
