Your family lawyer in a

book. Whether you are married or living together – with children or without, if you are thinking about or are in the process of splitting up, this book is for you. When a relationship breaks down it's hugely stressful and emotional – and often very confusing. Who gets to keep what? Will I ever see my kids? What needs to happen and when? What if things get nasty? This all-encompassing book, by family lawyer Laura Naser with years of experience helping couples reach the best

solution possible, is here to bring calm and clarity, whatever the situation. She will guide you through the entire process from making sure this is what you really want and knowing what's at stake, through to detailing all your options (whether you are married or not), what to do and in what order, and with a specific focus on co-parenting, managing money, social media, effective communication and how to resolve tricky issues that come up along the way. See this book as

your trusted companion and guide - everything you need to know to get through this and thrive is right here.

Leadership and management are general skills that apply in most walks of life, but in the scientific domain they require some special characteristics. Science thrives on challenge, whether it is the technical challenge of trying to do something which has not been done before or challenging a widely held but poorly supported hypothesis. Scientists are trained to challenge, and for the manager of science this can itself be a challenge. In the past, when science was on a

much smaller scale and less subject to public scrutiny, a less formal 'back-of-the-envelope' management style was acceptable, but those days are long-gone. Science costs much more and is rightly more accountable. Excellent scientists, however, do not necessarily make good managers and may not make good leaders. Nevertheless, like all skills, leadership and management can be enhanced and developed and even instinctively good managers can

improve. While the science of management and leadership is well developed, the management and leadership of science is less so. This book aims to introduce the working research scientist to the art and techniques of management and the skills necessary to be a good and effective manager and leader of science and scientists. This includes understanding the organization and functioning of scientific research establishments

(universities, laboratories, research councils, etc.) and how to deal with the associated committee work, recruiting, and team building; how to deal with difficulties managing projects and handling risks. The approach is pragmatic not dogmatic. Leadership and management are people skills, and each person is different and needs to be treated differently. The focus is on the principle and practice. While the subject is serious, the approach is conversational, with

anecdotes and practical examples.

FDA Warning Letters

About Food Products: How to Avoid or Respond to Citations uses examples of FDA warning letters about food products as training tools to discuss important quality and manufacturing issues encountered by food

companies around the world as they bring food products into the US market. Focused specifically on FDA warning letters surrounding new dietary ingredients and dietary supplements, the book first introduces FDA warning letters in general. Each chapter then focuses on specific issues identified, including HACCP/quality systems, imports/exports, food contact issues, etc. This book helps the food industry train professional team members (across

the spectrum of experience levels) to avoid common issues often cited in warning letters. It serves both as an authoritative reference on the common types of warning letters issued to food companies today, and as a guide to best practices for food manufacturers. Includes a range of specific warning letters as case studies and examples of method application Synthesizes often complex information into a clear presentation of FDA warning letters and how to deal with

them Describes techniques and methodologies to guide readers to the solution most appropriate for their scenario

Termination of Employment Digest
Government Printing Office

Whether you're addressing an initial infraction or handling termination-worthy transgressions, you need to be 100 percent confident that every employee encounter is clear, fair, and most importantly, legal.

Thankfully, HR expert Paul Falcone has provided this wide-ranging resource that explains in detail the disciplinary process and provides ready-to-use documents that eliminate stress and second-guessing about what to do and say. Revised to reflect the latest developments in employment law, the third edition of 101 Sample Write-Ups for Documenting Employee Performance Problems includes expertly crafted, easily customizable write-ups that address: sexual harassment, absenteeism,

insubordination, drug or alcohol abuse, substandard work, email and phone misuse, teamwork issues, managerial misconduct, confidentiality breaches, social media abuse, and more! With each sample document also including a performance improvement plan, outcomes and consequences, and a section of employee rebuttal, it's easy to see why over 100,000 copies have already been sold, making life for managers and HR personnel

significantly easier when it comes to addressing employee performance issues.

First published in 1996, Workplace Law has become one of the most widely used and frequently quoted text books on South African labour law. This 13th edition has been revised and supplemented to incorporate the latest case law, as well as the latest amendments to labour legislation. Workplace Law provides a complete overview of issues that have arisen

and are likely to arise on the shop floor, in court and in arbitration proceedings from unfair labour practices, through employment equity, dismissal and collective bargaining, to strikes. Students, HR and IR practitioners, lawyers, employers, employees and trade union officials will find this updated, comprehensive and reliable work a convenient and indispensable guide to a complex and fascinating area of law. Workplace Law is also available in electronic

form in Juta's Labour Law Library, where it is updated quarterly. -- *The Code of Federal Regulations of the United States of America* Violence against women is an enduring problem around the globe, yet very few books look at the full range of men's violences against women - perpetrated in relationships, in the family, in public spaces, and in institutions. While books that look at different types of violence, such as domestic violence,

'honour' based violence and rape in isolation are useful for depth, it is only by looking across these different spheres that the true extent of men's violences against women becomes clear. This book usefully covers all of the main forms of violence against women, looking at it from a research, policy, and practice perspective. Including discussion of fifteen different types of violence against women, this book is original in offering an introduction to such a broad range of topics, and for including

chapters on violences that have rarely been written about, as well as those that are more commonly discussed and those that have been sidelined in recent years. By bringing together work on violence against women committed by partners, family members, strangers, acquaintances,

institutions and businesses, this book widens the lens through which we view men's violences against women. Violence against Women is essential reading for criminologists and sociologists who want to be up to date with cutting-edge knowledge on this

topic. It is also an invaluable text for those training to enter or become qualified in the specialist domestic and sexual violence sector.
