George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Why I Write*, the first in the Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' - 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' - and considers the importance of keeping these in balance. *Why I Write* is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can - and must - be rediscovered with every age.' — Irish Times

*Flash Nonfiction Funny* John Wiley & Sons

In this wickedly funny cultural critique, the author of the critically acclaimed memoir and Hulu series *Shrill* exposes misogyny in the #MeToo era. This is a witch hunt. We're witches, and we're hunting you. From the moment powerful men started falling to the #MeToo movement, the lamentations began: this is feminism gone too far, this is injustice, this is a witch hunt. In *The Witches Are Coming*, firebrand author of the New York Times bestselling memoir and now critically acclaimed Hulu TV series *Shrill*, Lindy West, turns that refrain on its head. You think this is a witch hunt? Fine. You've got one. In a laugh-out-loud, incisive cultural critique, West extolls the world-changing magic of truth, urging readers to reckon with dark lies in the heart of the American mythos, and unpacking the complicated, and sometimes tragic, politics of not being a white man in the twenty-first century. She tracks the misogyny and propaganda hidden (or not so hidden) in the media she and her peers devoured growing up, a buffet of distortions, delusions, prejudice, and outright bullsh\*t that has allowed white male mediocrity to maintain a death grip on American culture and politics—and that

delivered us to this precarious, disorienting moment in history. West writes, "We were just a hair's breadth from electing America's first female president to succeed America's first black president. We weren't done, but we were doing it. And then, true to form—like the Balrog's whip catching Gandalf by his little gray bootie, like the husband in a Lifetime movie hissing, 'If I can't have you, no one can'—white American voters shoved an incompetent, racist con man into the White House." We cannot understand how we got here,—how the land of the free became Trump's America—without examining the chasm between who we are and who we think we are, without fact-checking the stories we tell ourselves about ourselves and each other. The truth can transform us; there is witchcraft in it. Lindy West turns on the light.

In *An Essay Concerning Human Understanding*, first published in 1690, John Locke (1632-1704) provides a complete account of how we acquire everyday, mathematical, natural scientific, religious and ethical knowledge. Rejecting the theory that some knowledge is innate in us, Locke argues that it derives from sense perceptions and experience, as analysed and developed by reason. While defending these central claims with vigorous common sense, Locke offers many incidental - and highly influential - reflections on space and time, meaning, free will and personal identity. The result is a powerful, pioneering work, which, together with Descartes's works, largely set the agenda for modern philosophy.

When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?
