The Wonders of Nature

Lab for Kids

Do you know your own feelings? Sometimes, we're happy, so we laugh and shout with glee. Other times, we're angry, and want to rage and roar. It is not easy to deal with our many contradictory emotions. To recognize our own feelings and deal with them responsibly is an important learning process for children, and a trial of limits.

This vibrantly and expressively illustrated book invites children to talk about feelings. It takes readers through a range of potential emotions without ever calling them "good" or "bad," allowing children to recognize

and examine their own emotional world.

O'Mara Books

Are you curious about fossils, dinosaurs, and prehistoric life? Then dig into this stunning children's encyclopedia. This fully revised edition of Knowledge Encyclopedia: Dinosaur! is loaded with fascinating facts. Did you know that Velociraptor had three large "killer claws" on each foot to hunt down prey? Or that the long-necked Diplodocus was as long as three school buses? Would you

believe that Carcharodon megalodon was an ocean monster with a fearsome bite at least six times stronger than today's great white shark? This dinosaur book for kids reveals more than 60 prehistoric creatures, from the age of the dinosaurs to the most recent Ice Age. From the flying Pterodactylus and ferocious Tyrannosaurus to the gigantic snake Titanoboa and magnificent woolly mammoth, this big book gets you up close and personal with these amazing animals. And with more than 400,000 copies sold worldwide, you too can become a dinosaur expert as you pore over pages packed with jaw-dropping 3D

images. If you're crazy about dinosaurs and paleontology, Knowledge Encyclopedia: Dinosaur! is the perfect book for you.

Story of the Titanic

wissenmedia Verlag

This is the tragic story of the Titanic, the biggest and most luxurious ocean liner the world had ever seen, which sank on her maiden voyage in April 1912. Beautiful, double-page illustrations with amazing cross-sections and cutaway details explain the construction and mechanical details of this gigantic ship and

reveal life onboard for passengers and crew. Each new illustration reveals different aspects of life in the early 20th century, and the text highlights hidden details for you to spot. As you follow the pictorial story of this world-famous liner, you will discover how she was built and equipped, what kind of passengers and crew she carried, and what facilities she offered onboard. You will also find out how she struck an iceberg and met with disaster, why she sank so quickly, how many people were saved, and how many lives were lost. You can compare the differences between the Titanic's passengers—from the first-class millionaires to the third-class emigrants—and find out

how they dressed, where they ate and slept, and what they did to amuse themselves during the voyage. You can also take a closer look at some of the passengers and crew, and follow their different fates from the exciting start of the voyage to its tragic end.

The Great Book of Dinosaurs Random House Books for Young Readers

Penguin

Thomas Hirschhorn, a leading installation artist whose work is owned and exhibited by modern art museums throughout Europe and the United States, is known for compelling, often site-specific and interactive environments tackling issues of critical theory, global politics,

and consumerism. His work initially engages the viewer through sheer superabundance. Combining found images and texts, bound up in handcrafted constructions of cardboard, foil, and packing tape, the artworks reflect the intellectual scavenging and sensory overload that characterize our own attempts to grapple with the excess of information in daily life. Christina Braun, the first to compile and systematically analyze the extensive source material on this artist's theoretical principles, sheds light on the complicated yet constitutive relations between Hirschhorn's work and theory. Her study, now translated into English, makes a

major contribution to the study of contemporary art.

Who Stole the Apples? Hauschka Verlag

Relates the adventures of a horse and a bear as they try to discover who has stolen the apples from the apple tree that grows in a forest clearing.

Workman Publishing
How do hurricanes form? Why does the moon change shape? What are tectonic plates? You'll discover the answer to these questions and many more when you step inside the inner workings of Planet Earth! From digging deep under the ground to floating to the highest layer of the atmosphere - you might be surprised where you end up. In

this fascinating introduction to Planet Earth, large, colourful diagrams are brought to life by tiny people running around performing the actions that are explained in the text. The 80-page extent allows for an in-depth look at the workings of our planet, from the water cycle and the atmosphere, to how the seasons change and why hurricanes happen.

Double gatefolds give a large space in which to explore complex processes such as the rock cycle and evolution. A follow-up to the successful book, *Stuff You Should Know About the Human Body*.
