Robert Peurifoy was a giant in the field of construction engineering and authored several books during his lifetime.

This book last published in 1989 and will capitalize on the well-known name of the author. In this edition, computer calculations of costs and of modeling have been added as well as updated statistics, computer related examples and new problems. Civil, Environmental, and Construction Management Engineering Majors and Professionals will benefit from having this title on their shelf. This edition retains the conceptual strengths of the Peurifoy approach and

organization from the previous edition but the new problems and computer-based examples and new up-to-date construction data make it the only choice in academia or industry.

Pembuatan rencana anggaran biaya (RAB)

yang akurat sangat diperlukan agar pembangunan rumah dapat berjalan lancar. Pemilik rumah biasanya memercayakan pembuatan RAB ini kepada pemborong atau tukang. Namun, tak ada salahnya pemilik rumah menguasai cara penghitungan RAB ini agar tidak ditipu oknum pemborong atau tukang yang nakal. Buku ini memberi solusi agar penghitungan RAB menjadi lebih praktis dan mudah dilakukan orang awam sekalipun. Di

dalamnya berisi panduan menggunakan aplikasi “MENGHITUNG RAB” yang terlampir dalam CD. Aplikasi ini berbasis program sederhana, Microsoft Excel, yang familiar di semua kalangan. Perhitungan dilakukan berdasarkan harga satuan material dan pekerja di lima kota besar: Bodetabek (Jakarta), Medan, Surabaya, Yogyakarta, dan Makassar. Harga tersebut dapat di-update sesuai kenaikan harga yang setiap saat dapat terjadi. Miliki segera buku

ini dan Anda pun akan pintar menghitung RAB dalam sekejap. Architecture; Drafting and Design
 Pandu Bangun Persada Nusantara
 This is a study of the management problems experienced by selected metropolitan cities in South and East Asia and of the approaches adopted in resolving them. Although the region contains many of the

world's developing countries, it is not an exception to the universal trends in urbanization, which have had a massive impact on its metropolitan cities. Apart from Tokyo, the cities concerned tend to dominate the economic and political scene in their respective countries, but for the purposes of this discussion it is not inappropriate to refer to them and the problems they face as being broadly metropolitan. Urban geographers and planners now tend to use the term 'metropolitan' to refer to a

large identifiable area of continuous urbanization consisting of several administrative jurisdictions.

Demographers today often classify cities with populations of more than one million people as metropolitan, and in common usage the term is widely employed to symbolize social, economic, and political status. All of these characteristics apply to the cities studied here.
