This book is for the Ministry of Defence Police constables whose professionalism, dedication and commitment was tested and proved beyond doubt, whilst seconded to the United Nations Interim Administration Mission in Kosovo. After years of relative boredom and the humdrum of repetitive plodding behind Coulport's protective security fences, John Duncanson, and a selection of his fellow police officers, chose to temporarily rid themselves of the adopted tag 'glorified security guards' by volunteering for a United Nations

peacekeeping deployment to Kosovo. Little did they know what waited for them as they stepped onto the tarmac at Pristina airport but they were soon to learn as they had to adapt to living on the same planet, but a totally different world...

The Crisis Intervention Team (CIT) program has become a globally recognized model for safely and effectively assisting people with mental and substance use disorders who experience crises in the community. The CIT Model promotes strong community partnerships among law enforcement, behavioral health providers, people with mental and substance use disorders, along with their families and others. While law enforcement agencies have a central role in program development and ongoing operations, a continuum of crisis services available to citizens prior to police involvement is part of the model. These other community services (e.g., mobile crisis teams, crisis phone lines) are essential for avoiding criminal justice

system involvement for those with behavioral health challenges? a goal of CIT programs (Steadman & Morrisette, 2016). CIT is just one part of a robust continuum of behavioral health services for the whole community.

*Parents Killing Children: Crossing the Invisible Line* explores hidden forms of violence within the family. This socio-legal study addresses the interactions between the family and the state, focusing on six parent perpetrators and the ways in which child endangerment is concealed within society. Drawing on symbolic interactionism, mythology and a modelling of case study data, this book puts forward a unique conceptualisation of representation and risk, both on familial and state levels. The failure of the state to intervene and neutralise volatile perpetrators also sheds light on the socio-legal status of children - society's most vulnerable - and the book concludes by discussing means by which the underlying social conditions and maladies symptomatic of child abuse and killing should be addressed.

So much of the process of criminal justice depends on good documentation, and criminal justice professionals can spend as much as 50-75% of their time writing up administrative and research reports. Much of the legal process depends on the careful documentation that records crucial information. And yet most of these law enforcement, security, corrections, and probation and parole officers have not had adequate training in how to provide a well-written, accurate, brief, and complete report.

*Report Writing for Criminal Justice Professionals* provides practical advice on report writing -- with specific writing samples and guidelines. The authors go beyond the routine English grammar approach to deal with the difficult but often-ignored problem of documentation that will hold up in court. Important concepts are emphasized with related checklists, forms, and pull-out chapter tests. The material is organized into three sections: *The Nature of Report Writing*, *The Mechanics of Report Writing*, and *The Modernization of Report Writing* NEW TO THIS EDITION Updated and revised with new material on forensics and scientific reports, crime reporting, common errors in forensic reports, and automation of report writing. Text complemented by numerous examples, sample reports and tools. Each chapter concludes with a sample test for the reader to self-evaluate learning. Two new criminological approaches are defined and applied to categories of crime in Routine Activity and Rational Choice, now available in paperback. Routine activity analyzes the criminal event, and avoids motivations and psychology as topics for discussion, whereas rational choice approaches crime as purposive behavior designed to meet the offender's commonplace needs, such as money, status, sex, and excitement. These conceptual models are both employed to analyze such crimes as drunk driving, gun use, kidnapping, and political violence. This volume discusses the relationship of these theories to more traditional

approaches to crime studies. The Advances in Criminological Theory series encourages theory construction and validation in the articles and themes selected for publication. It also furthers the free exchange of ideas, propositions, and postulates. Following publication of the first volume, Michael J. Lynch of Florida State University asserted that "Advances in Criminological Theory is to be applauded as an attempt to revive criminological theory by providing an accessible outlet." Contributions to this volume include: Pierre Tremblay, "Searching for Suitable Co-offenders"; Raymond Paternoster and Sally Simpson, "A Rational Choice Theory of Corporate Crime"; Richard B. Felson, "Predatory and Dispute-related Violence"; Gordon Trasler, "Conscience, Opportunity, Rational Choice, and Crime"; Ezzat A. Fattah, "The Rational Choice/Opportunity Perspectives as a Vehicle for Integrating Criminological and Victimological Theories"; Patricia L. Brantingham and Paul J. Brantingham, "Environment, Routine, and Situation"; Maurice Cusson, "A Strategic Analysis of Crime"; Richard W. Harding, "Gun Use in Crime, Rational Choice, and Social Learning Theory."

**Strengthening Forensic Science in the United States** Andrews UK Limited Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic

science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Predictive Crime Analysis using R is Dr. Strickland's second crime analysis book. In this volume, rather than using data to describe crime history, he uses it to predict crime using pattern created with advanced clustering methods, crime series linkage, and text analysis. Coverage includes prediction of conventional crime and terrorist attacks. The open-source software R is introduced and used in developing crime data, including Geo-spatial data, and constructing predictive models and performing post analysis. Using actual crime data from cities like Atlanta, Dr. Strickland also shows how to simulate additional data from actual data. Simulated data can then be used in cities with insufficient actual data, but with similar demographics and human behavior.

Professional financial traders are currently overwhelmed with news and extracting relevant information is a long and hard task, whilst trading decisions require immediate actions. Primarily intended for financial organizations and business analysts, this book provides an introduction to the algorithmic solutions to automatically extract the desired information from Internet news and obtain it in a well structured form. It places emphasis on the principles of the method rather than its numerical implementation, omitting the mathematical details that might otherwise obscure the text, and focuses on the advantages and on the problems of each method. The authors also include many practical examples with complete references and algorithms for similar problems, which may be useful in the financial field, and basic techniques applied in other information extraction fields which may be imported into the financial news analysis.

This book provides a comprehensive overview of the emerging interdisciplinary field of critical forensic studies. It reviews existing research and scholarship on forensic science from a critical social science perspective, while forging a blueprint for further work in

this area. Forensic science has long captured the public imagination, as evidenced by the popularity of many novels, television programmes, and true-crime podcasts. At the same time, its role in the criminal justice system has been the subject of critique from scholars and practitioners in diverse fields. In response, the international forensic science community has become more involved in the scrutiny of its own knowledge and practices in relation to criminal justice objectives. Moving beyond a discussion of forensic science as a suite of specialised scientific disciplines that aim to provide evidence to the courts, *Critical Forensic Studies* offers critical insights relevant to a wide range of social actors in the criminal justice system. Core content includes: • the history and public understandings of forensic science • the professionalisation of forensic science • forensic science as a social process • crime scene examination and forensic intelligence • experts and evidence in court • technological advances and human rights • interdisciplinary knowledge, practice and research This book is essential reading for forensic and criminal justice practitioners and students across criminology, sociology, forensic science, law, and psychology.
