Lawyer jokes have been around since there have been lawyers. In fact, the very first lawyer to ever pass the bar was Mediocritus, who went on to invent the billable hour. People make jokes about lawyers for the same reason that dogs lick themselves because they can. Lawyers are easy targets because everyone in America has at one time either a) hired a lawyer, b) hated a lawyer, or c) has been a lawyer. No matter what your affiliation with the legal profession is, you will enjoy this book. If you don't enjoy it, hey, sue us.

Written by experienced deafie owner Amanda Brahle and using contributions from dozens of deaf dog owners, this truly is a “Must Read” for anyone opening their

home to a deaf dog. Inside these pages you’ll find answers to the most important questions a new deaf dog owner is faced with: What accommodations do you need to make for your deafie? How to prepare your home for a deaf dog Training, communication, and hand signals How do you safely socialize a deaf dog with other dogs? How can you promote comfort and security with your deafie? Amanda’s story: Before I adopted my deaf Catahoula, I searched and searched for information on what to expect and how to care for him. I needed a What to Expect When You’re Expect guide but for deaf dogs.

Unfortunately, each source I read fell short. Most sources offered the same generic, inadequate information and advice. None prepared me for what owning a deaf dog was really like. I knew I could write a better guide, so I did. And here it is! This is the guide I wish I had before adopting my deaf dog, when I brought him home, and for the months and years that followed. Find out what it’s truly like to own a deaf dog: from accommodations to cuddles. This book will provide you with the information you need to understand and best care for a deaf dog. My goal is to help you feel confident in your decision when considering if a deaf dog is the right choice for you, and, if it is, to assist you in training your deaf dog. Deaf dogs are lovable goofballs with a lot of love to share, but they require owners that are prepared to handle all aspects of their personalities and needs. If you’re feeling overwhelmed after adopting a deafie or uncertain whether or not to adopt a deaf dog, this book is for you.

The question of whether dogs should be allowed off the leash in public places has become a major political issue in cities and suburbs across the United States. In the last two decades, "leash-law disputes" have burst upon the political scene and have been debated with an intensity usually reserved for such hot-button issues as abortion and gun rights. This book investigates what has changed in American community life, social mores, and the relationship between humans and dogs to provoke such passionate responses. At its heart, the book details and evaluates the handling of three leash-law disputes, all of which were exceedingly divisive and emotionally intense. Two of the cases took place in San Francisco, a city with a reputation as one of the most dog-friendly in the United States until 2001-2002, when officials curtailed off-leash walking. The other case study occurred in Avonùa wealthy suburb of Hartford, Connecticutùwhen town officials unilaterally imposed a leash law at a popular off-leash park. This book is not only a revealing study of Americans' conflicted attitudes toward animals and the difficult balance between individual rights and the public good in our communities. It is also a useful source of information for both dog owners and local government officials who are faced with leash-law disagreements

A moving selection of poems for dog lovers, accompanied by charismatic line drawings, from a poet with an "unfailing mastery of her medium" (New York Times Book Review). Reflecting on her long and celebrated career in poetry, two-time National Book Award finalist Linda Pastan was struck by the number of dogs that have appeared in her poems—whether as the primary subject or in the briefest of allusions. Dogs run through these poems, so to speak. The poems span the lighthearted to the serious, from the antics of training a recalcitrant dog to the grief at a beloved dog's death. With warmth, dignity, and quiet power, Pastan explores the many roles of these devoted animals, from household pet to Argos, Pluto, and the Dog Star. "Envoi" We're signing up for heartbreak, We know one day we'll rue it. But oh the way our life lights up The years a dog runs through it.

No matter how cushy their lives, dogs live on our terms. They compromise their freedom and instinctual pleasure, as well as their innate strategies for coping with stress and anxiety, in exchange for the love, comfort, and care they get from us. But it is possible to let dogs be dogs without wreaking havoc on our lives, as biologist Marc Bekoff and bioethicist

Jessica Pierce show in this fascinating book. They begin by illuminating the true nature of dogs and helping us "walk in their paws."; They reveal what smell, taste, touch, sight, and hearing mean to dogs and then guide readers through everyday ways of enhancing dogs's freedom in safe, mutually happy ways. The rewards, they show, are great for dog and human alike.

Explosive Ordnance Disposal (EOD) personnel are some of the most highly trained people in the military, with a job description that spans defusing unexploded ordnance to protecting VIP's and state dignitaries. EOD are also one of the first military groups to work with robots every day. These robots have become an increasingly important tool in EOD work, enabling people to work at safer distances in many dangerous situations. Based on exploratory research investigating interactions between EOD personnel and the robots they use, this study richly describes the nuances of these reciprocal influences, especially those related to operator emotion associated with the robots. In particular, this book examines the activities, processes and contexts that influence or constrain everyday EOD human-robot interactions, what human factors are shaping the (robotic) technology and how people and culture are being changed by using it. The findings from this research have implications for future personnel training, and the refinement of robot design considerations for many fields that

rely on critical small group communication and decision-making skills.
