The Art of Deception Univ of California Press "Be in no doubt: the beer was drunk but the man drank the beer." "We must avoid vulgarities like 'front up'. If someone is 'fronting up' a television show, then he is presenting it." Simon Heffer's incisive and amusingly despairing emails to colleagues at the The Daily Telegraph about grammatical mistakes and stylistic slips have attracted a growing band of ardent fans over recent years. Now, in his new book Strictly English, he makes an impassioned case for an end to the sloppiness that has become such a hallmark of everyday speech and writing, and shows how accuracy and clarity are within the grasp of anyone who is prepared to take the time to master a few simple rules. If you wince when you see "different than" in print, or are offended by people who think that "infer" and "imply" mean the same thing, then this book will provide reassurance that you are not alone. And if you believe that precise and elegant English really does matter, then it will prove required reading.

 This book introduces a new typology of "inward- and outward-oriented" higher education internationalization, and investigates China's current situation of shifting from a mainly "inward-oriented" higher education internationalization to a more balanced approach. It describes the gap between China's soft power goals of using higher education internationalization for image and influence enhancement and the reality, and examines the three major dimensions of China's "outward-oriented" higher education internationalization (i.e. the Confucius Institute program based on Sino-foreign higher education collaboration, international development aid in higher education, and higher education level international student recruitment) based on reflections provided by international graduate students in English instruction programs in education-related majors in three Chinese universities. Providing both theoretical insights and real-world examples, this book is suitable for higher education researchers, graduate students in the relevant fields, administrators of higher education institutions, and policymakers in the government sector.

 This book analyses the development of academic literacy in low-proficiency users of English in the Middle East. It highlights the challenges faced by students entering undergraduate education in the region, and the strategies used by teachers to overcome them. The author focuses on a large-scale undergraduate teacher programme run in Oman by the University of Leeds, providing clear pointers both for future research and effective practice. He also explores the implications of his findings for countries beyond the Gulf Cooperation Council, demonstrating how international participation in UK HE could be much wider. This book will appeal to students and scholars with an interest in academic literacies and English for Academic Purposes.

 Diese neue umfassende Studie zu Simon Magus verleiht der Erforschung der frühen Christenheit und den Fragen nach Herkunft und Wesen des Gnostizismus neuen Nachdruck. Der Autor geht dabei von der traditionellen Exegese von Act 8,5-24 - der ersten narrativen Quelle zu Simon - und den späteren Berichten antiker christlicher Schriftsteller aus. In einem Überblick zur Literatur der griechisch-römischen Antike wird der Einfluss der Begriffe "magisch" und "die Magier" auf die Wahrnehmung und Beschreibung Simons bestimmt. Schließlich bezieht der Autor sozialwissenschaftliche Erklärungsmodelle und moderne Bestimmungen von "Identität" ein und gibt damit der Diskussion um das Phänomen Simons neue Impulse.

 Across the world, universities are more numerous than they have ever been, yet at the same time there is unprecedented confusion about their purpose and scepticism about their value. What Are Universities For? offers a spirited and compelling argument for completely rethinking the way we see our universities, and why we need them. Stefan Collini challenges the common claim that universities need to show that they help to make money in order to justify getting more money. Instead, he argues that we must reflect on the different types of institution and the distinctive roles they play. In particular we must recognize that attempting to extend human understanding, which is at the heart of disciplined intellectual enquiry, can never be wholly harnessed to immediate social purposes - particularly in the case of the humanities, which both attract and puzzle many people and are therefore the most difficult subjects to justify. At a time when the future of higher education lies in the balance, What Are Universities For? offers all of us a better, deeper and more enlightened understanding of why universities matter, to everyone.

 Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.
