The Ridiculously Simple Guide to Chromebook Linden Publishing

In 2016, Google announced it was getting into the home assistant business with Google Home. The smart device allowed users to essentially have a computer controlled by their voice.

Google was just getting started. In 2017, Google released two more devices: the Google Home Mini and Google Home Max. Finally, in 2018, Google announced that its smart speaker would get a whole lot more visual with the Google Home Hub. The Google Home Hub is a hybrid of two worlds--a device that works best with both your voice and by touch. The same voice commands as the non-touch Google Home's are there, but a screen gives it the extra touch you need to control things in your home like security cameras. It's original, powerful, and just a little weird! It's unlike anything you've ever used--not quite a tablet, not quite a voice assistant, not quite a computer--it's a Hub! Because it's a little weird, it takes some getting used to; this guide will walk you through what you need to

know to get the most out of the powerful display. Ready to get started?!

Getting a new iPhone is exciting; it can almost feel like getting a new toy. Nobody likes a toy that makes you read a lengthy manual just to figure out how the darn thing works! If you've already had an iPhone (or maybe several), then

chances are you already know how it works. But the iPhone X will throw you a curveball because the Home button has been removed. It used to be a few times a year Apple would take the stage and announce something that everyone's head exploded over! The iPhone! The iPad! The Apple Watch! The iPod! That still happens today, but Apple also is well aware of the reality: most people don't upgrade to new hardware every year. How does a company make money when that happens? In a word: services. In the past few years (especially in 2019) Apple announced several services--things people would opt into to pay for monthly. It was a way to continue making money even when people were not buying hardware. For it to work, Apple knew it had to be good. They couldn't just offer a subpar service and expect people to pay because it said

Apple. It had to be good. And it is! This book will walk you through those services and show you how to get the most out of them.
